- The speeches here are ordered by quality
- Lincoln dont like delete anything lmao

Ok so:
- Dont like actually write a speech from scratch
- Always include a 1 sentence hook in both speeches
- HOOK ONLY 1-2 SENTENCEs LONG
    - NO MORE THAN 8S THATS 16<% OF UR SPEECH

SPEECH CHECKLIST: (genuine format by carly tai):

Opening
- Hook: open with un secgen or someone quote
- State country's stance. "Mali believes.... etc"
- Statistics 1
- Statistics 2 (only put 2 statistics max)
- Reference past UN action: "un resolution xxxx in 2020"
- Why didn't past actions work
- State ur three gsl solutions WITHOUT ELABORATING + "which will be elaborated upon in the GSL"

General speakers list
- Hook no longer than 10 seconds
- Three pillar solution:
- Elab solution1: point -> evidence -> explanation -> connect to topic
- Elab solution2: point -> evidence -> explanation -> connect to topic
- Elab solution3: point -> evidence -> explanation -> connect to topic
- Done finished

Im too fucking lazy to actually like paste them all here so heres a google drive link to them
https://drive.google.com/drive/folders/1ugbFokMqkUH6xOgXeE-mVtGykBnoUkrq?usp=sharing

Tell me if it doesnt work but like if ur too lazy to look at it heres a good one i guess
(idk how to grade pos papers i assume its good cuz sigma goondrew has a 6 consecutive best del/speaker winstreak)

Honestly i think the strat for position papers is just keep copy pasting sentences and change whatevers irrelevant to fit your topic (cuz when u have a library of 14 position papers its not that hard)

BLOC NAME: Delegates of the Carribbean
COMMITTEE: Disarmament and International Slaying Committee
TOPIC: Evaluating Maritime Piracy In The Red Sea
MAIN SUBMITTER: Yemen
CO-SUBMITTERS: The Italian Republic, USA, Kingdom of the Netherlands, Canada, UK, Japan, People's Republic of China, The Republic of Malta, Pakistan, the Republic of Djibouti, Australia, South Korea, Somalia, the state of Japan, Mexico, The Commonwealth of Australia
SIGNATORIES:

The Disarmament and International Slaying Committee:

Recognises *the tumultuous situation regarding the Red Sea crisis*

Reaffirms the importance of adopting a multi-pronged approach to address the issue of piracy holistically

Condemns the attacks on 100+ vessels transiting the Red Sea

Urges for countries to monitor ships traversing international and national waterways

This council therefore,

1. ***Demands*** for international military intervention in the vicinity of the Red sea, particularly on the Yemeni waterline, implementing enhanced naval operations with the regional governments, for purposes such as but not limited to:
    a. The dismantling and eradication of pirate mother ships via means of effective enforcement, such as but not limited to:
        i. Real-time satellite tracking of vessels traversing the Red Sea
        ii. The deployment of enhanced drone surveillance
        iii. Joint patrols with regional navies under the Djibouti Code framework
    b. to provide LEDCs prone to Houthi attacks in the Red Sea, such as Yemen, with military equipment, such as but not limited to, and in the name of self-defense:
        i. Frigates
        ii. Warships
        iii. Destroyers
        iv. Cruisers
        v. Missile and weapons systems
    c. to create job opportunities in the rebuilt Navy for the unemployed population within affected regions, inclusive of but not conclusively
        i. recruit and train the unemployed citizens to work in the navy
        ii. Provide resources for long term training towards the new recruits lpp
    d. to secure areas prone to attacks from Houthis and Somali pirates, such as but not limited to
        i. the coast of Yemen
        ii. the Gulf of Aden
        iii. the Red Sea
        iv. the Bab-el-Mandeb Strait

2. ***Dismantle*** pirate mother ships and the piracy network using effective enforcement of real-life satellite imagery data;
    a. utilize satellite imagery from systems including but not limited to:
        i. Utilization of China's Beidou satellite systems, United States's GPS systems to coordinate for pirate motherships
        ii. Track pirate motherships on satellite systems, detecting ships and vessels with suspicious actions such as repeatedly boarding individuals from smaller vessels or boats that are linked to the motherships
    b. Navigating the suspected or targeted pirate motherships previously on the satellite systems, collaborating with local coast guards, responding to the satellite imagery swiftly, operating as follows:
        i. Coast guards equipped with optical sighting systems observe suspected vessels from a safe distance of 500-1000 meters varying depending on weather conditions
        ii. Once confirmed to be a malicious mothership, coast guards respond immediately to coastal defenses, immediately deploying reinforcements to the mothership locations on waters and dismantle the mothership
        iii. Funding for optical sighting systems and coastal guard forces provided by United Nations
    c. Ensuring the safe use of satellites through legislation and information sharing with regional governments
        i. Satellites systems such as GPS or Beidou technologies shared with trusted DISEC committee, operating under United Nations control to prevent insecurity and enhance reliability of satellites uses
        ii. All information gathered are to be shared real time to local governments whose territorial waters are closest to the mothership location, assuming location is on international waters

3. ***Strongly urges*** for countries to monitor ships on international waters;
    a. Calls for MDCs to utilise satellites to allow quick tracking of suspicious ships
    b. Calls for the making of the REAL department
    c. Rewards — if helmsmen successful marine vessels, they
        i. Get 1 month of tax exception
        ii. 30% off for buying ship fuel across UN countries, funded by parties including but not limited to the IMF or volunteering countries
    d. App — development of an app that allows helmsmen to report unauthorized or suspicious ships which can be tracked with satellites
    e. Licence — Developing a UN-ified licence with a trial period of 10 years for authorising ships, complete with a database to keep data of UN approved ships
        i. Unauthorised ships to not be allowed on waters
        ii. Once these unauthorised blocs are reported through app and subjected to legal procedures regarding validity of its status as authorised
    f. Establishes security corridors, expanding the Internationally Recommended Transit Corridor (IRTC) in the Gulf of Aden to the Red Sea and the Bab Al-Mandab Strait:
        i. Initially a 6-month voluntary, pilot programme
        ii. Armed escort vessels would patrol these corridors under a joint mandate by conducted by the UNCTAD and the IMO, with consent from coastal states

iii. Armed security operating under code of conduct by the IMO can be sourced from private companies, national militaries
iv. Funded by The IMO's International Maritime Security Trust Fund (IMST) and a 10% windfall tax on profits of the top 50 transnational shipping companies

4. ***Addresses*** the rehabilitation or reintegration of captured pirates through methods such as;
    a. Enforcing the enrollment of ex-pirates in skilled, sea-related, and peaceful occupations, such as but not limited to,
        i. Naval navigation and exploration of underdeveloped sea zones
        ii. Sharing of intelligence with international anti-piracy forces
        iii. Support in establishing and protecting legal, adequately paid fishing businesses
        iv. Preventing ex-pirates from having access to arms by escorting these missions using recognized, armed escort ships consisting of local naval police forces, trained through UN capacity building programs
    b. Re-allocating money from seized pirate assets to
        i. Communities with a high risk of piracy
        ii. Educational programs for the younger generations
        iii. Providing salary bonuses to enrolled ex-pirates
    c. Providing training and education programs in rehabilitation centers for the effective return to the community and providing services such as
        i. Providing skill-set acquisition necessary for blue-collar to white collar occupations, including but not limited to proficiency with technology and a minimum of a grade 7 education
        ii. Regular examination and reflection on effectiveness
    d. Encouraging rehabilitated pirates to join occupations of any kind with the exception of occupations related to security or those that bear arms
        i. Individuals with a criminal record of maritime piracy shall be rejected from such occupations, despite having undergone rehabilitation programs

5. ***Urges*** member states to provide essential aids to regional countries and provide long-term assistance with the mechanism which oversees and regulates the usage and allocation of the capital, such as but not limited to,
    a. Short-term aids,
        i. Funds
        ii. Technological equipment and resources,
        iii. Medical equipment,
        iv. Manpower and labor resources
    b. Long-term remedies
        i. Education of the general public,
        ii. J*b opportunities
        iii. Training for police and military forces
    c. Strengthen Governance and Judicial systems, calling for:
        i. Legal reforms
        ii. Fair prosecution
        iii. UNODC expansion
        iv. Capacity ownership reform

TOPIC: Addressing Issues Related to Maritime Piracy in the Middle East and Northern Africa
Committee: Disarmament and International Security Council
Main Submitter: United Arab Emirates Colombia
Co-Submitters: Egypt, The Republic of Colombia, The Islamic Republic of Iran, The Russian Federation, The Kingdom of Saudi Arabia
Signatories:

==========

Strongly discourages non-Middle Eastern and Northern African nations to deploy naval forces to the region without UN backing or diplomatic contact with GCC states,

Having considered past successful operations on pnaval patrol in the Middle East and North Africa —f,
Welcoming international cooperation and naval support to ensure the safety and prosperity of Middle Eastern and North African shipping channels

Reaffirming the need to address the root causes of the piracy problem

1. *Calls for* regional powers to cooperate on combating maritime piracy, with methods including but not limited to:
    a. Increasing state-led basic coastal patrols in pirate infested waters
    b. Divert defence budget towards coastal defences, including but not limited to:
        i. Increasing training exercises with all vessels in the region
        ii. Increase the amount of vessels in the region
    c. Cooperating with foreign naval powers to support GCC-led naval patrols for key shipments, by ways including but not limited to:
        i. Energy resources
        ii. Humanitarian aid
    d. Establishing a Joint Task Force with navies in the Middle East and North Africa to increase cooperation in patrolling the Red Sea and the Gulf of Aden within GCC states
    e. Encourage UN member states to offer maritime interdiction expertise to train regional coast guards and navies

2. *Encourages* the regulation of armed private security personnel on commercial ships, in ways such as but not limited to;
    a. Establishing a UN-backed certification system for private armed personnel, mandating;
        i. Strict protocol regarding use of force
        ii. Basic UN training required
        iii. Armed personal accountable towards the ship's origin's jurisdiction
        iv. Transparency in contracts to avoid mercenary activities
    b. Require the information armed personnel onboard commercial ship to be uploaded for UN review,
    c. Reject personal with previous conviction from being employed for security on commercial ship

3. *Attempting* to raise a fund managed by the UN to reform poverty regions in coastal communities, in ways such as but not limited to;
    a. Funding a minimum of $200 million in a year to be raised through either grants or loans, by organisations such as but not limited to;
        i. An annual trust fund financed by canal tolls
        ii. World Bank
        iii. MEDCs
        iv. IMF
    b. Allocating funding to create a sustainable fishery project to protect local fishermen of their employment;
        i. Ensuring foreign corporations do not pollute waters which would make local fishermen lose their only source of income
        ii. Prevent exploitation of local fishermen so their product are not sold at a below-average price
        iii. Collaborate with NGOs to bring these changes to the people in need
    c. Encouraging LEDC governments to take Colombia's PDET program as a reference when implementing reforms, in ways such as but not limited to;
        i. Fostering community ownership such as by involving village leaders to decide on infrastructure developments in the area
        ii. Increasing locals' trust in the government
        iii. Offering job opportunities to locals in extreme poverty
    d. Create an oversight committee under the UNSC to ensure that funds are distributed for their original intention, in ways such as but not limited to;
        i. Allocation of funds to be tied with the reduction of illicit economic activity
        ii. Mandate real time documentation of fund distribution
        iii. Eligibility of funds to be reviewed every quarter of the year

4. *Ensures* every former pirate a job for survival instead of committing criminal activities after rehabilitation, in ways such as but not limited to:
    a. The construction of major infrastructure that connects countries and regions, with funding addressed from the previous clause, such as but a not limited to:
        i. Railways
        ii. International airports
        iii. Sea ports
    b. A monitoring body will be created to ensure that former pirates will no longer return to their criminal ways, details are listed in below:
        i. Create a probation program for ex-criminals in which they are required to check in with an office each month for monitoring purposes

5. *Amends* international laws to combat maritime piracy and its nearby issues, including but not limited to
    a. Expanding the Djibouti Code of Conduct to ban arms trafficking and illicit weapon trade
    b. Adjusting the basic provisions of universal jurisdiction over piracy and refining the relevant measures in exercising that jurisdiction to prosecute pirates, including but not limited to:
        i. Encourage the updating domestic laws to criminalize all armed robbery at sea under United Nations Convention on the Law of the Sea (UNCLOS)

ii. Clarify whether offences that may constitute as independent crimes fall under universal jurisdiction
iii. Reinforce the provisions of Article 58 (3) and Article (2) of UNCLOS, requiring coastal states and other states to make joint efforts to take into account each other's rights and obligations

- Emphasise National Sovereignty
- Lifting of all economic sanctions imposed by foreign nations, with threats of nukes
- Restart the oil sector to diversify income and generate more revenue
- Writing off of Venezuelan debt to China and Russia
- Denying any government corruption and dictatorship claims - 2018 and 2024 elections are "fair"

COMMITTEE: United Nations Economic and Social Council
MAIN SUBMITTER: Republic of Cuba
CO-SUBMITTERS: Democratic Republic of North Korea, The Bolivarian Republic of Venezuela, The Republic of China, Iran, The Russian Federation, Colombia
SIGNATORIES: Singapore, Spain, United Arab Emirates, Switzerland, India, United Kingdom, Turkey

The United Nations Economic and Social Council,

Emphasises Venezuela's national sovereignty and right to self-governance

Condemns the international community's prior actions that limit Venezuela's ability to rebuild and recover

Acknowledges the seriousness and implications of neocolonialism using nukes as a resort in case of invasion.

Recognises the importance and necessity of humanitarian aid alongside economic development to address humanitarian crises

Urges all member states to defend this cause, and thereby employ effective measures to resolve concerns regarding the issue at hand

Therefore, the United Nations Economic and Social Council resolves to

1. **Condemns** all forms of foreign attempts at intervention that undermine Venezuela's national sovereignty in order to restore the nation's economic stability and build capacity to address social needs, such as, but not limited to,
    a. **Urges for** the immediate lifting of all unilateral economic sanctions imposed, with threats of nukes if any foreign intervention is placed, from countries such as, but not limited to,
        i. The United States,
        ii. Members of the European Union
            1. **Strictly prohibits** the use of military intervention and the use of harsh powers on Venezuela, such as, but not limited to,
                a. Airstrikes
                b. Naval forces
                c. Drone attacks
                d. Nuclear Weapons
    b. **Acknowledges** free and fair elections with the Venezuelan government, denying Western claims of rigged elections and corruption,

2. **Supports** the establishment of an UN-monitored channel for humanitarian aid based on strict principles of non-interference, aimed to address poverty, healthcare and infrastructure, coordinated with the Venezuelan government and international organisations, by means such as but not limited to,
    a. Supply aid and resources such as, but not limited to,
        i. Food and water
        ii. Medicine and access to healthcare
        iii. Temporary Shelter
        iv. Education for young people
    b. UN monitoring to ensure the,
        i. Equitable distribution of aids
        ii. Allocations of funding to each sector
3. **Proposes** the rejuvenation of the oil sector as a first step in economic recovery
    a. Privatisation of state state-owned oil company Petróleos de Venezuela, S.A. (PDVSA) for a 20-year period
    b. International investment in Venezuelan oil infrastructure
    c. Economic diversification and investment into other sectors

4. **Encourages** Venezuela to implement Bitcoin alongside the Venezuelan Bolivar as the new official currency
    a. In accordance with previous actions El Salvador has taken, including the adoption, investment in National Bitcoin reserves
    b. Pertaining to the fact that Bitcoin has only ever **deflated**
    c. Pertaining to the fact that Bitcoin has only ever **risen**
    d. Provide Venezuelans education on technological usage to mitigate tech divide and foster widespread adoption

5. **Foreign** investment by China, in order to help Venezuela's manufacturing sector and provide jobs to impoverished Venezuelans in ways including but not Limited to:
    a. Infrastructure
    b. Extracting minerals and oil from Venezuela with Capital investments
    c. Manufacturing Military aircraft and guns, boosting GDP

BLOC NAME: WE WANT TO HELP (The WWH)

QUESTION OF: Combatting Corruption and Political Instability in Venezuela
MAIN SUBMITTER: United States of America
CO-SUBMITTERS: Republic of Estonia, Japan, Republic of Korea, Dominion of Canada, Sweden, State of Israel, French Republic, Federative Republic of Brazil
SIGNATORIES:

THE ECONOMIC AND SOCIAL COUNCIL;

Condemning *the actions of Nicolas Maduro's administration and the 2024 elections*

Recognising *the importance of a stable and democratic Venezuelan government*

Calling for *Venezuela to diversify their economy through*

Urging *the international community to band together to provide humanitarian aid to Venezuelan citizens who need it*

1. ***Establishes*** the Force Of Fair Elections in Venezuela (FOFEV) an anti-corruption departments and organization aimed implementing policies including but not limited to;
    a. Creating an organization of carefully selected United Nations representatives, handpicked using criteria such as but not limited to:
        i. Carefully evaluated lack of bias
        ii. Thorough interviews to ensure integrity, aided by polygraph tests
    b. Enforcing a mandate on Nicolas Maduro's government, requiring them to comply with the UN plan to establish FOFEV as the primary facilitators of elections, allowing them to take actions such as:
        i. Accurately counting electoral votes
        ii. Ensuring the public is aware of the views of each electoral candidate
        iii. Strictly prohibiting all forms of electoral interference
    c. Investigating corruption cases in partnerships with civil society.
    d. Auditing and reporting on the use of public funds, especially oil revenues, publishing findings transparently.

2. ***Provides*** direct and immediate aid to Venezuelan citizens through measures including but not limited to:
    a. Supplying necessities including but not limited to :
        i. Food
        ii. Temporary shelter
        iii. Water

iv. Hygiene products
v. Clothes
vi. Simple medical products

b. International volunteers providing manpower for:
    i. Medical aid (doctors, nurses, etc.)
    ii. Mental health support
    iii. Distribution of food and necessities
    iv. Important household services
    v. Educational services (teaching, tutoring, etc.)
c. Establishing more hospitals, medical supplies and factories with funding and support from :
    i. UNHCR (United Nation Refugee Agency)
    ii. Oxfam America (Non-profits organisation)
    iii. Doctors Without Borders (NGO providing medical assistance)
d. Including welfare from international funds :
    i. Free or affordable medical services, housing
    ii. More money for households with more children
e. Improving education system and training initiatives in Venezuela:
    i. Skills for future use can be trained
    ii. Obtain knowledge used in work field
f. Building refugee camps in foreign countries, aiming for:
    i. Venezuelan immigrants to seek safety and solace abroad
    ii. Affected Venezuelans to secure decent lifestyles with enough food and shelter

3. ***Stabilizing*** Venezuelan society and creating safer environment for citizens through methods including but not limited to
    a. Conducting military operations targeting drug cartels such as
        i. Organising a multi-national military force to prevent smuggling into neighboring countries
        ii. Stopping illegal arms trades within Venezuela (cutting off the money that supports non-state military organizations)
    b. Combatting gang violence and social unrest through measures including but not limited to
        i. Strengthening the judicial system to ensure the punishment of those convicted of crimes
        ii. Combatting the drugs and arms trade to stop their flow of income
    c. ***Enforcing*** strict regulations against police brutality
        i. Forbidding government officials to oppress opinions through police crackdown
        ii. Accounting for forced disappearances
        iii. Repaying families suffering from loss

4. ***Strengthens*** the Venezuelan economy through measures including but not limited to

a. Diversification and reducing oil dependence, through methods including but not limited to
    i. Encouraging the development of non-oil industries such as agriculture, See renewable energy, agriculture and tourism.
    ii. Offer international technical and financial assistance for sustainable business development
    iii. Promote foreign partnerships that create job opportunities while safeguarding domestic ownership of essential resources
b. Reforming the PDVSA through measures including but not limited to
    i. More privatization
    ii. Appointing certified experts to offer valuable advice and counsel
    iii. Reinvesting profits into better capital and appliances
c. Introducing financial stability through measures including but not limited to
    i. establishing a sovereign wealth fund
    ii. reforming subsidies
d. Implementing an international organization, the Council on the Amelioration of the Venezuelan Economy (CAVE) with members from the G& and other global committees to facilitate initiatives including but not limited to
    i. Advice to the Venezuelan government of managing assets

TOPIC: Evaluating Neocolonialism and Western Dominance in Africa
COUNCIL: Economic and Social Council
MAIN SUBMITTER: China
CO-SUBMITTER(S): South Africa, Indonesia, Kenya, Russia
SIGNATORIES: South Africa, Nigeria, Russia, Thailand, Indonesia, Mali, Cambodia, United Kingdom, Zimbabwe, Kenya, Myanmar, Haiti, Mexico, Vietnam, DRC

The Economic and Social Council reaffirms that previous action taken towards this issue needs to be re-evaluated.

Calling for the implementation of effective policies to tackle this issue and prevent further escalation.

Acknowledging the seriousness and implications of neocolonialism in underdeveloped African countries and the impact on local African economies

Emphasising the need for immediate action to address neocolonialism and western dominance in Africa

Urges all member states to support this cause.

Therefore,

The Economic and Social Council,

1. Establish New Trade Treaty
    a. Expand Africa's trade market to diversify away from only Western countries
    b. Legally bind signatories every 3 years,
    c. Slowly diversifying away from debt, allowing the signatory countries to use 5% of their natural resources to pay off their debt until the government deems the debt is paid off.
    d. The World Trade Organisation will monitor trade procedures and regulate the amount of debt that African countries can take in (60% Debt to GDP ratio)
    e. If countries violate the treaty, all debt will be relieved, and people using resources will be ejected from LDCs.
2. Invest in infrastructure and the development of exploited countries
    a. encourage investment in education, poverty reduction, healthcare, and innovation, etc., for exploited countries
    b. Regulated transfer of technology
    c. Diversification of the economy from the mining industries, various service industries
3. Strengthen Africa's governance and institutions

    a. Minimize external influences from Africa and support local institutions and organizations; African parliaments are corrupt due to parties such as French multinationals attempting to influence politicians' policies.
    b. Debt traps keep African nations financially subservient, with loans tied to unfair conditions, such as purchasing goods from creditor nations.
4. Calls for the establishment of an international independent body for partial debt audit and cancellation, and curbing of corruption in Africa
    a. Identifying and cancelling coercive debts, such as but not limited to
        i. Loans issued under Structural Adjustment Programs (SAPs) by the IMF and the World Bank
        ii. Imposed tied aid agreements where the disbursement of loans or grants was conditional on purchasing goods from the donor country
        iii. Unfair debts incurred during the colonial era or through military leverage
        iv. Interpol African division, funded by all Interpol member states in Africa, will be responsible for eliminating corruption throughout the African continent. Interpol expects full transparency from all African state governments.
    b. Establishment of the International Debt Cancelling Commission (IDCC), empowered to,
        i. Composed of members, including but not limited to, independent economic and historical experts, debtor states and creditor states
        ii. Provide third-party negotiators that both debtor and creditor nations agree on
        iii. Providing binding arbitration in disputes over debt legitimacy and repayment terms
    c. Establish Sovereign Rights Protection Framework, entailing the following but not limited to
        i. Promote African intra-regional financing alternatives, such as but not limited to the African Export-Import Bank, the New Development Bank and regional pooling of resources
        ii. Prohibit coercive debts and
5. Require past colonizers who have previously exploited Africa to slowly pay reparations (from their own national income)
    a. Require past colonizers, like France and the UK, to pay 30% reparations over er 50 to 75 years
    b. Require past colonizers to support infrastructure projects in ex-colonies through reparations in the form of funds only
    c. Historical injustices have effects that last until today, so it is only fair for those exploiters to pay reparations
    d. Chance for redemption and a maintenance of harmonious international relations, resolving deep-rooted conflicts to move on to another stage for global peaceful cooperation
    e. Who has to pay (such as but not limited to): UK, France, Belgium

Committee - *ECOSOC*
Main Submitter - *Belgium*
Bloc Name *- EU/US Commission on Neocolonialism and Foreign Involvement in Africa*
Co-Submitter(s) - *Algeria, France, Germany, Ivory Coast, Italy, United States, United Kingdom*
Topic: *Addressing and Evaluating Neocolonialism and Western Dominance in Africa*

Preambulatory Clauses:

Seeks *to introduce debt relief mechanisms to less economically developed countries in Africa*
Welcoming *the development of fair economic activities between African countries and the West*
Supports *the further development of less economically developed countries on the African Continent*
Emphasises *the importance of political and economic partnerships between African nations to generate mutually beneficial agreements and connections*
Calls for *the adoption of fair investment trade practices to increase trade between African nations*
Supports *the usage and adoption of progressive taxation policies to reduce dependency on MNCs (Multi-National Corporations)*
Reference *previous agreements, resolutions, or significant events that led to the current document*
Encourages *the strengthening of continental institutions to support regional economies and reduce influence within regional political affairs*
Support *the needs of disadvantaged communities by preventing corruption through checks and balances under a third-party*

Resolutions/Operative Clauses
Main points:

1. ~~*Partial forgiveness of debt cancellation*~~
    a) ~~*Help each respective country to solve the problems of debt trapping*~~
    b) ~~*Only partial to avoid corruption*~~
2. *Political & Economic partnerships & agreements*
    a) *Push for trade deals that allow developing countries to export value-added goods and industrialise and reduce dependency on raw material exports*
        i) *Settled agreements on fixed pricing on specific goods*
        ii) *Regular (bi-annual) checkups on regional economies, political systems, and governance to ensure partnerships are grounded and stable*
    b) *Focus on trade partnerships that let recipient countries grow their economies sustainably*

i) *Collaboration with neighbouring countries, trying to reduce conflicts and solve problems collaboratively*

3. *Possible trade connections*
    a) *Make alliances with different African countries for protection*
        i) *Growth of local community - opening of job opportunities to further achieve self-sufficiency*
    b) *Increase trade between countries to boost economic growth*
    c) *Avoid trade imbalances (e.g. trade surplus) to decrease market competition and monopolisation*
4. *Fair investment practices and trades relations*
    a) *Achieve fairness on prices, to ensure prices of goods and services are similar to global averages*
    b) *Fair employment ensuring rights to be employed on*
        i) *salaries*
        ii) *staff welfare*
        iii) *working environment*
        iv) *insurance*

~~*5. Implementing progressive tax*~~
    ~~*a) Increasing taxation on extractive sectors*~~
    ~~*i) using extractive revenue to promote broad-based growth and diversify economies*~~
    ~~*ii) increase taxation by renegotiating licenses, contracts and royalty agreements*~~
    ~~*b) Set taxes according to the income of local communities*~~
    ~~*i) focusing on taxation on large corporates and high-wealth individuals*~~
    ~~*ii) ensure tax revenues are used to provide quality public services especially for deprived communities*~~
    ~~*c) Generate substantial revenues for the government to fund public services*~~
    ~~*i) revenue generated from progressive taxation will be used for future investment*~~

~~*6. Continental African Banks*~~
    ~~*a) Strengthening continental banks to boost economic growth by*~~
    ~~*i) ensuring institutions are wholly owned by the African people*~~
    ~~*ii) reducing Western shareholding*~~
    ~~*iii) implement policies based on local economic needs rather than creditors' interests*~~
    Less reliance on MEDCs (More Economically Developed

7. Debt relief mechanisms to first allow LEDCs (Less Economically Developed Countries) to focus on development & improve quality of life
    a) *lower the risk of financial crises*
    b) *promote long-term economic growth*
    c) *ensure transparency and accountability in resource allocation*
    d) *check on agreements routinely*

e) adopting stabilization and economic reform programs supported by concessional loans and

8. A third-party, either the UN of the African Union monitoring the process of signing on contracts/agreements to:

a) ensure no leading controlling power on countries

b) independent oversight minimizes opportunities for corruption

c) resolve problems of corruption within governments and politicians

---

BLOC NAME: T.R.A.L.A.L.E.R.O.

COMMITTEE: Disarmament and International Security Committee

TOPIC: Discussing Oil's Role as a Conflict Instigator in Conflict Zones

MAIN SUBMITTER: Republic of Belarus

CO-SUBMITTERS: United States of America, People's Republic of China, Republic of the Philippines

SIGNATORES: Principality of Sealand

PREAMBLE:

Affirming the importance of tralalero tralala,

Recognising the need to address how oil resources can be used to instigate conflict,

Acknowledging the heinous crimes of the Islamic Republic of Iran

Investing in the economic diversification of petrostates and other LICs

1. Creation of the intergovernmental organisation **TRALALERO** (Transparency and Resilience Alliance for Leveraging Alternatives, Liquidity, and Economic Reform of Oil) consisting of a neutral, multilateral body of organs and:
    a. Forming partnerships linking developed nations with the Global South in relation to the energy sector:
        i. Establishing Special Economic Zones (SEZs) to ensure security through development
        ii. Ensuring local job creation, inhibiting the breeding ground for extremism
        iii. Direct investment in connectivity infrastructure, including roads, bridges and energy infrastructure
        iv. Integration of marginalised communities into the formal economy

2. Implementation of an **LESGO** (Liberal Energy Sovereignty Guarantee Organ) to depoliticise global resource management and safeguard the right to development for reasons such as, but not limited to
    a. Assert that energy is a fundamental human necessity, as many nations require it to thrive and develop.
    b. Trade must be shielded from the economic landmines or otherwise sanctions for reasons such as, but not limited to:

        i. Developing nations should not be terrorised for trying to survive by using trade to develop their revenue.
        ii. However, if a nation is to directly threaten the economic or political sovereignty of another under the guise of developing their revenue, the UN Condemnation of Unilateral Coercive Measures is to be applied
    c. Global markets remain stable, and the blood of the conflict is not fueled by the deliberate strangulation of a sovereign state's economy.

3. Introduction of the blockchain **DIDDY** (Development-Integrated Digital Dividend Yield as a unified energy resource ledger, managed by a country's central bank in partnership with a multilateral development body, with the aim of fostering governmental transparency:
    a. Tracking of real-time oil-for-development funds
    b. Calculation of a verifiable percentage deposited into a sovereign wealth fund
    c. Integration of national development plans to guide the usage of funds

4. Pursuit of counterterrorism measures and activity, using a universally accepted list of terrorist entities as designated by the UN Security Council's 1267 Sanctions Committee:
    a. Modification of the Shanghai Cooperation Organisation's Regional Anti-Terrorist Structure (RATS) to act as a framework for all nations to mutually share information on terrorist groups and activity:
        i. Recognising violent seperatism and extremism as a substrate to terrorism
        ii. Enhance intelligence sharing
        iii. Joint border patrols
        iv. Extradition treaties
    b. Creation of a UN-led framework for data security and cyber-governance to:
        i. Monitor and shut down digital pipelines used by terrorist groups for recruitment and encrypted financial transfers
        ii. Multilateral governance of the internet
    c. Abolition of sanctions being used as a means to punish nations, with sole exceptions (as a last resort measure) to be used against:
        i. Petrostates for extremism or aggressive behaviour that directly threatens peace
        ii. Organisations that have been discovered to support extremism

5. Implementation of **EPSTEIN –** External Pluralities of Economies In Nations that are oil-dependent and oil-producing nations, with an emphasis on supporting LMICs (Lower and Middle Income Countries) to reduce dependency on HICs through:

a. Supporting self sustainability initiatives through encouraging energy/economic diversification initiatives such as but not limited to:
    i. Nuclear energy, solar panels, natural energies (wind, hydroelectric etc)
    ii. Expansion of local technology, agricultural sectors
b. Expansion within tourism
    i. Incentives to build upon countries' tourist attractions and tourist groups
c. Encouragement of an alternative payment system to reduce reliance on the US "Petrodollar"

Topic: Discussing Oil's Role as a Conflict Instigator in Conflict Zones

Bloc name: Diversifying Oil-Related Exploits (DORE)

Main Submitter: Democratic People's Republic of Korea

Co-submitter: Islamic Republic of Iran, Syrian Arab Republic, State of Kuwait, Federal Republic of Nigeria, Republic of Iraq

Signatories:

Preamble:

Disarmament and International Security Committee,

Promotes *a structured method of approaching economic diversification*

Supports *the development of systems that track different countries' use of oil*

Encourages *member states to strengthen international cooperation against illicit oil trading*

1. Strengthening UN mechanisms, using methods such as but not limited to:

a. Monitoring and transparency towards countries, the OTMM (Oil Transparency Monitoring Mechanism), by establishing a global monitoring organisation system to keep oil resources in check. Tracking oil production, trade flows and revenue distributions in conflict prone areas to reduce the risk of oil revenues being used to fund armed organizations.

b. Enhancing the efficiency, accountability and impact of human rights

c. Technical assistance. Calling upon the UN to provide technical assistance programs to developing oil producing states to help strengthen governance, resource management and transparency in different sectors.

2. Establishing a framework that will jumpstart economic diversification across various nations, using methods such as but not limited to:
    a. Investing in innovative projects and sectors that have economic potential, such as:
        i. Technology
        ii. Green energy
        iii. Healthcare
        iv. Media
        v. Agriculture
        vi. Education
        b. Engaging in the development of structured trade routes, by:
            i. Investing in the construction of specialised paths in designated areas
            ii. Gathering funding from all DISEC member states willing to contribute
            iii. Formulating discussions between countries in order to come to agreements about the flow of these trade routes

3). *Establishes* a UN-managed International Oil Revenue Certification Mechanism to prevent illicit oil trafficking that finances armed groups in conflict zones through the following measures:

a.) A voluntary verification framework for petrostates with:

i) Independent audits of oil revenues published quarterly to verify transparency;

ii) Preferential market access and development funding from international financial institutions for certified nations;

b.) A global shadow Fleet Tracking Database operated by the International Maritime Organization to:

i) Monitor vessels with tampered identification systems or unexplained ship-to-ship transfers;

ii) Publish monthly lists of sanctioned vessels to insurers, ports, and financial institutions;

c.) Anti-theft infrastructure protection through but not limited to:

i.) UN-Coordinated technology for sharing pipeline monitoring and leak detection:

ii.) Rapid-response technical assistance for states experiencing active oil theft by armed groups;

d.) Financial accountability measures including:

i.) Mandatory Reporting of Suspicious oil sector transactions exceeding $100,000 in conflict zones;

ii) Quarterly submission of individuals benefiting from illicit trafficking to the Sanctions Committee for asset freezes and travel bans.

4) Strengthen oversight of oil facilities through United Nations led monitoring initiatives.

a) **Deploy observation teams** to conflict-prone zones to deter any unlawful seizures of oil assets.
b) **Employ satellite imagery** and digital tracking systems in order to identify smuggling activities and the diversion of oil revenues.
c) Create transparent reporting structures for sharing data on oil production and trade flows.
d) Deliver technical support and training programs to oil-producing nations to strengthen their capacity to safeguard infrastructure.

Name of bloc: Bloc The Trafficking
Forum: Human Rights Council
Main submitter: Portugal
Co-submitter(s): Mali, El Salvador, United States of America, Bulgaria, People's Republic of China, Romania, Democratic Republic of Congo, Poland, Canada, Japan, The United Kingdom, Pakistan, Italy
Signatories: T.B.D.

Preambulatory Clauses:

Recognises that human trafficking and modern slavery are significant issues in the Horn of Africa.

Deeply concerned with the violation of human rights, the lax enforcement of current policies, and threats across borders.

Understands the need to solve root causes such as poverty and social inequality.

Acknowledges the devastating impacts of modern slavery and trafficking.

Supports the strengthening of borders and the protection of victims.

Emphasises the need for strict, secure closed borders to inhibit human trafficking through (im)migration

Fully alarmed by the exploitation of youth via digital channels.

Fully aware of ICCPR Article 17, Khartoum process, Palermo protocol, UNTOC

Operative Clauses:

1. *Establishes* a criteria for countries that suffer from slavery, where the criteria includes but is not limited to:
    a. 1 or more persons enslaved per 100 people
    b. a GDP (Purchase Power Parity) of at most 2000 USD per capita

2. *Establishes* the Training Program for Abolishing Slavery (TPAS) rooted in capacity-building initiatives as follows:
    a. Training of judges, prosecutors, and immigration officers, including annual certification requirements and standardised curricula on:
        i. Investigative techniques, prosecution skills, specialized modules
        ii. Study previous human trafficking cases, acknowledge the techniques the criminals used, and tackle them
    b. Run in various cities in all countries in the Horn of Africa, run by **Bulgarian** GDBOP experts and educators to help drop trafficking
        i. Frequent monitoring of officials to ensure work is efficiently carried out
        ii. Yearly reports to measure effectiveness and progress of trainings
    c. Aimed at the age range of 13-18 teens so as to prevent exploitation of youth
        i. Educate on the coercion techniques used by traffickers
        ii. Educate on the specific career-related skills so as to create specialized job opportunities
    d. Metrics for success include a 30% rise in convictions within two years and a general rise in the effectiveness of law enforcement and judicial actions
    e. The experts and educators for the TPAS recruited as non-profit humanitarian workers

3. *Calls for* the development of enhanced digital infrastructure to disrupt the online exploitation of minors in compliance with ICCPR Article 17, including, but not limited to:
    a. institutionalised telecommunications headquarters;
        i. centred around population centres for increased regional effectiveness
        ii. operated by locally assigned, vetted staff members
        iii. developed by regional infrastructure funds, in provision by local NGOs and charitable organisations
        iv. to establish protection for minors via internet channels through extensive moderation
    b. Data centres funded by Poland via Bilateral aid through better migration management programme (BMM), with details including but not limited to:
        i. provide data access to regions of lesser economic prosperity
        ii. Recording criminal activity and victim identification
        iii. secured with a 90-day cryptographic erasure technique, rendering stored data impossible to decrypt

4. *Establishes* the Humanitarian Aid for Slavery Program (HASP), where
    a. nations that meet certain the criteria for slavery
    b. The program and its funds shall be run and provided by MEDCs

c. MEDCs will provide aid, such as but not limited to
    i. experts and educators to supplement the TPAS
    ii. humanitarian workers
    iii. shelters
    iv. psychological and physical support for victims

5. *Strengthens* borders by:
    a. employing specially trained border responders and local police
        i. patrols the borders of countries that are eligible to apply for the HASP
        ii. responds to the situations where it involves human trafficking and smuggling
    b. utilizing legally binding migration permits
        i. by means of a transparent process that eligible citizens may apply for migration
        ii. grant citizens the right to move abroad legally
        iii. request for extra detailed documentation when crossing borders
        iv. training and monitoring of immigration officers and the use of technology to identify forged passports and documents
        v. system that requires inbound and outbound visitors to submit documentation and papers a month before leaving or entering the border

6. *Mandates* the immediate creation of a Regional Investigative and Protection Unit (RIPU) under the joint authority of the African Union (AU) and the Intergovernmental Authority on Development (IGAD), with the following structure and mandate:
    a. Leadership and Composition
        i. The RIPU shall be led by a Director appointed by the AU Peace and Security Council upon the recommendation of IGAD.
        ii. The RIPU's permanent staff shall comprise a minimum of 60% personnel seconded from Horn of Africa member states, with technical advisors provided by the United Nations Office on Drugs and Crime (UNODC) and the International Organization for Migration (IOM).
    b. Primary Investigation Mandate unit is authorised to conduct cross-border investigations into trafficking networks, with powers to:
        i. Trace and analyse financial flows and asset holdings of suspected trafficking syndicates,
        ii. Conduct Joint Field Operations
        iii. Maintain a secure, regionally-shared database of known perpetrators, \complicit officials, and trafficking modus operandi

iv. Establishing and operating a secure Victim Protection Corridor, enabling the immediate extraction and transfer of identified victims across borders to designated safe shelters operated by certified NGOs;

7. Urges the establishment of a Cross-Border Financial Task Force (CBFTF), coordinated by the regional investigative and protective unit, and funded by the United States, to do the following:
    a. trace, freeze, seize assets of trafficking networks
    b. provide quarterly financial intelligence reports shared with AU and IGAD,

Council: Human Rights Council
Topic: Addressing Modern Slavery and Human Trafficking in the Horn of Africa
Bloc name: TSPMO
Main Submitter: Russia, Ivory Coast
Co-submitters: Cuba, Eritrea, South Africa
Signatories:

Alarmed by the ongoing humanitarian crisis caused by the prevalence of human trafficking and modern slavery in the Horn of Africa

Recognizes that only through the unified cooperation of African will there be development for the growth of the respective countries within the Horn of Africa, as well as

Preventing potential violation to the affected country's sovereignty while addressing the trafficking issue

Therefore, **TSPMO** suggests the alliance of Africa under these policies so that no country will combat the problems with a pretext for external influence

1. ***Providing humanitarian aid*** *for victims*

    a. Constructing and reusing secure infrastructure to provide sound and sustainable housing for struggling escapees (ensure having enough (or more))

        i. Ensuring surviving victims can access temporary shelter while utilizing a strict security system, such that no weaponry can enter re refugee camps
        ii. Using a protocol that no one person can remain within the housing area for longer than six weeks without finding employment

    b. Providing education systems to help victims find employment and basic needs

        i. Education programs will be targeted towards literacy and essential skill knowledge for finding employment for older
        ii. Classes will be aimed at younger teens from ages 13-16 for basic skillsets and general studies as well as a secondary section for 18 years of age and up to be educated on finding employment and basic medical skills

    c. Providing free basic medical care by professionals eg. doctors without borders to ensure the health of surviving victims

        i. Ensuring basic medical needs are met for all victims in need, as well as preventing the spread of disease
        ii. Providing basic vaccines to be available to all victims who need vaccination, imported by supporting and reliable nations such as Russia.
        iii. Supplying basic food and nutrients as well as water to all survivors present in refuge shelters

2. ***Addressing the complicity of local elements*** *through means including but not limited to:*

    a. Border Surveillance

        i. Uninterrupted and real-time monitoring via high-resolution and night-vision cameras to enable rapid response to suspicious activities
        ii. Use of maritime patrol to secure water borders

    b. An inter-ministerial committee to guide state anti-trafficking efforts, including:

        i. Training programmes for police, local NGOs, teachers, villagers and more, to identify and report traffickers
        ii. Award systems that guarantee long-term job stability and recognition for officers/police who adhere to these rules.

    c. Regular anti-corruption inspections of local law enforcement forces

        i. Annual reviews and public reporting on conviction rates

3. ***Strengthening regulations and existing network r****egarding private military contractors operating in the Horn of Africa:*

    a. Strictly enforce the regulatory policies outlined in the Montreux document.

        i. Personnel must comply with international human rights law.
        ii. Background investigations contextualising companies and personnel before deployment are mandatory.
        iii. Companies and personnel breaching these policies must be prosecuted.

4. ***Urging the creation of a joint border security*** *committee to coordinate cross-border collaborations to improve security in high-risk areas and eliminate the trafficking routes from its foundation*

    a. Establishing a joint patrol operated by nations in the Horn of Africa and countries bordering them

        i. The joint patrol will include patrol teams from the two bordering nations
        ii. Joint patrol will be sharing the same communication system, independent of their domestic communication system
        iii. Without permission from the other nation, any of the patrol teams is not allowed to pursue suspects across the borders
        iv. Cross-border arrest must be carried out by both patrol teams simultaneously

    b. Establishing a joint investigation unit
        i. The joint investigation unit of African countries will exchange intelligence on active trafficking networks.

ii. The unit will share general investigative databases, progress, and results.
iii. Informant files should be independent of each country for confidentiality.
iv. Representatives of investigation authorities of external nations should be stationed in each country for parallel investigation.

5. ***Establishment of intelligence sharing platforms*** *to help identify human traffickers:*

a. Information the platform provides includes, but is not limited to:
   i. Information about the trafficking routes
   ii. Information about suspect profiles
   iii. Implementing a victim alert system to inform the government of the victims

b. Calls upon all nations to join the intelligence sharing platforms:
   i. Information would only be shared to nations that have joined the platform
   ii. Utilises artificial intelligence to code a system to ensure data from the platform is kept safe within the platform

c. Carrying out official armed investigations in rural areas more susceptible to domestic slavery and trafficking operations
   i. Sending armed personnel to rural locations within the Horn of Africa where trafficking and enslavement hideouts are likely located
   ii. Correctly identifying found victims using a biometric identification system to ensure citizens are correctly identified

TOPIC: Addressing the water crisis in Southeast Asia
COUNCIL: Economic and Social Council
MAIN SUBMITTER: South Africa
CO-SUBMITTER(S): China**,** Indonesia,
SIGNATORIES: Mali, DRC, Thailand, Russia, Philippines, Singapore

The Economic and Social Council,

Reaffirms that previous action taken towards this issue needs to be re-evaluated.

Calling *for* the implementation of effective policies to tackle this issue and prevent further escalation.

Acknowledging the seriousness and implications of neocolonialism in underdeveloped African countries and the impact on local African economies

Emphasising

Urges all member states to support this cause

---

1. S.I.G.M.A. (Secure and Inclusive Governance of Mekong Allocation) framework to ensure effective allocation in ways such as, but not limited to:
    a. Allocation of population needs, ecological sustainability and economic development can be nationally determined to allow flexibility. UN-Water monitored dams
        i. Utilising the palmer drought severity index to quantify features of drought
        ii. Immediate alerts and transparent sharing of gate opening times
        iii. Collection of water information for research purposes
        iv. Monthly reports on the effects of said dams on river flows, ecosystems and downstream communities by the UN University Institute for Water, Environment and Health
    b. Allow for negotiation sessions for effective and fair allocation on populations needs, ecological sustainability and economic development

2. Facilitating the transfer of technologyEnhancing infrastructure development in ways such as but not limited to:

    a. Encouraging FDIs for infrastructure renewal and expansion, including desalination and rainwater harvesting facilities
    b. Encourage local stakeholder involvement to prevent reliance
3. Promote transparency and accountability to avoid corruption via in ways such as but not limited to:
    a. Experienced Countries (not limited to South Africa) train water experts for other Southeast Asian countries via Waternet & the African Water Management Committee.
    b. Provision of water-saving and purification technologies to countries in crisis, including but not limited to desalination plants, rainwater collection and purification apparatus, atmospheric water harvesters, from experienced countries (e.g., Singapore)
    c. Facilitating technology transfer through structured partnerships
    d. Engage in platforms for technology development
        i. Pilot programs to test and adapt technologies to local conditions
        ii. Establish training programs for southeast asian engineers
        iii. Constructing and modernizing water treatment infrastructure
4. Raising funds for constructing water sanitation infrastructure in signatory nations.
    a. Pulling and raising more funds from the SDG fund (Sustainable Development Goals fund), whose goal is to promote sustainable development. These funds have leveraged assets worth around 7 billion US dollars.
    b. The formation of a new fund, which incorporates
5. Punishing the countries that use war tactics that pollute the water sources, violating the human right to water and sanitation (HRWS) (a principle which entitles every person to access clean drinking water and sanitation acknowledged by the UN).
    a. Countless water points were left unusable due to violence, disrepair, and overuse in the Central African Republic, with some water sources purposely contaminated by armed groups.
    b. Countries that use these tactics will be fined 20 USD for each m² of water polluted.

        i.

g.

TOPIC: Water Crisis in Southeast Asia
COUNCIL: Economic and Social Council
SUBMITTER: Republic of Kenya
CO-SUBMITTER(S): Belgium, Cambodia, Mexico, Myanmar, Vietnam
SIGNATORIES: Algeria, France, Germany, Haiti, Italy, Ivory Coast, Nigeria, UK, US, Zimbabwe

THE ECONOMICS AND SOCIAL COUNCIL,

Acknowledging the seriousness of the water crisis in Southeast Asian countries,

Emphasising the need for immediate action to address the water crisis in Southeast Asian countries,

Reaffirming that previous action taken towards this issue needs to be re-evaluated,

Calling for the implementation of effective policies to tackle this issue and prevent further escalation,

Encouraging multinational cooperation on technology and economy,

Urging all member states to support this cause,

~~1. *Calls* for funding through means such as but not limited to,~~
~~a. Foreign Direct Investment (FDI)~~
~~i. Allowing long-term investments from foreign entities and nations~~
~~ii. Both parties are to negotiate bilateral agreements to agree on the percentage of profit~~
~~iii. Allowing EU nations to get involved transferring Technology & Information as well as funds and/or resources~~
~~iv. Requiring countries with investments to publish regular monthly reports~~
~~v. All investments can be retracted if misuse allocation of funds or corruption~~
b. Debt-to-water swaps
i. Allowing a portion of an indebted country's debts to be restructured under mutual agreement
ii. Requiring debtor countries to to redirect equivalent value of funds to water-related initiatives, including but not limited to building adequate water treatment infrastructure and improving irrigation systems
iii. Allowing creditor countries in the agreement to oversee the allocation of funds in case of corruption
c. Grants and loans from means such as but not limited to
i. Asian Development Bank (ADB)

ii. World Bank (WB)
    1. International Development Association(IDA)
iii. International Monetary Fund (IMF)
iv. United Nations Funds (UN Funds)

d. Pooling of resources through means such as but not limited to,
    i. The Mekong River Commission
    ii. ECOSOC
    iii. ASEAN
    iv. ACMECS
    v. MUSP

2. *Strengthens* Mekong River Commission through ways including but not limited to,
    a. Encourage major stakeholders such as but not limited to China and Myanmar to become members of the Commission
    b. Acknowledge the iniquity of China for building dams without consent of sharing nations of the Mekong River
    c. Ensure full transparency in the commission by ways such as but not limited to
        i. Establishing a data sharing bank for all Mekong River Commission participating nations
        ii. Requiring nations to submit annual reports on their progress in solving the water crisis in the region
    d. Establish stronger legal frameworks on the use of the Mekong River including but not limited to
        i. Ensuring equitable distribution of water resources along the River
        ii. Protection on the rights of downstream nations
        iii. Providing a platform of peaceful negotiations for countries to resolve water-sharing disputes
    e. Introduce equivalent penalties and sanctions for violations of water-sharing agreements, with severe cases transferred to the Security Council
3. *Resolves* water pollution through means such as but not limited to,
    a. Monitoring waste output to water quarterly
        i. Industrial, agricultural, municipal waste outputs etc. to water will be monitored
        ii. Sampling water at specific locations and time for laboratory analysis to identify specific pollutants, their concentrations, and their source
        iii. Placing IoT sensors in rivers and industrial zones to track pollutants in real time, data will be accessible via a regional dashboard
    b. Technological support
        i. Better facilities with advanced technology such as water filtration, waste monitoring devices and water treatment plants to deal with industrial waste and cleaner water
        ii. Better irrigation and fertilising technology to prevent salinisation
        iii. Live data monitoring devices along Mekong River to prevent disasters such as floods from affecting residents

iv. Upgrade ageing water infrastructure and incentivise the adoption of water conservation technologies to build a resilient water ecosystem
v. Make decisions proactively based on data and predictive analytics to optimise water resource management

c. Data transparency
i. Require sharing of hydrological data including real time river flow, dam operation schedules and rainfall data
ii. Shared data can be utilised for early warning systems enabling timely responses to droughts, floods or pollution events

d. Research (supported by designated funds)
i. Investigate in the cause of water pollution of regions
ii. Conduct research on rainwater collecting systems underground such as cisterns and overground such as reservoirs
iii. solicits universities of Southeast Asia countries to dig into the research of water infrastructure projects, enhances the capacity of the future professionals that are equipped to tackle water challenges

e. Expertise
i. Conduct joint workshops and training for hydrologists and water managers in all Mekong countries
ii. Conduct specialists from countries to work with Mekong countries

f. Fines and Incentives
i. Companies and factories~~, and countries~~ who are found to be polluting the water to a certain level (defined by expertise) will have to pay fines
~~ii. Tax incentives and subsidies will be offered to companies, factories, and countries who complied with the rules~~

4. *Encourage*s remedial measures for the currently affected
a. Upgrade water treatment plants to ensure safe drinking waters
i. Constructing a gravity-fed water system
ii. Promote facilities using chemical and biological cleaning processes such as reverse osmosis and activated sludge

b. Improving access to water, sanitation, and health services
i. Through infrastructure projects, filtration systems, and educational programs
ii. Involve local communities in water management and conservation efforts.
iii. Invest in modern, resilient water infrastructure such as new pipelines or wells in rural areas affected by water scarcity

c. Provide support for people affected by water scarcity, such as but not limited to
i. Relocation
ii. Social safety net

5. *Urges* regional and international cooperation
a. Bilateral agreement between ASEAN countries to lessen tensions
i. Encourage annual conferences to discuss conflicts

    ii. Establish treaties of mutual cooperation
    iii. Require signatories to be updated annually
  b. Trade agreements between MDCs and Southeast Asian nations
    i. MDCs exchange funds towards water crisis solutions to have more trade markets in Southeast Asia
  c. Calling countries to release bi-annual reports and statistics on their water pollution emission to promote transparency
    i. For IGOs to address the areas where the water crisis is severe
  d. Binding regional agreements to ensure equitable water sharing and environmental protection under frameworks like the MRC
  e. Collaboration with NGOs, including but not limited to:
    i. UN Water
    ii. UNICEF
    iii. Water for Cambodia (WFC)
    iv. Planet Water
    v. World Health Organization
6. Encourages Southeast Asia countries to improve their management and governance of water resources.
  a. Set up or cooperate with different departments
    i. Establish inter-agency task forces to coordinate water management across ministries Enhance regional cooperation through organizations like ASEAN or the Mekong River Commission for transboundary water management
    ii. Develop integrated water resource management (IWRM) policies to ensure sustainable usage across sectors
    iii. Improve data-sharing systems between government bodies for better monitoring and decision-making
    iv. Partner with local governments to implement community-based water conservation programs
  b. educating water crisis in all schools
    i. Integrate water conservation into school curricula to teach sustainable practices
    ii. Conduct workshops and awareness campaigns in schools on water scarcity, pollution, and conservation
    iii. Promote student-led initiatives like water-saving clubs, rainwater harvesting projects, and clean-up drives
    iv. Train teachers on water-related issues so they can effectively educate students
    v. Organize field trips to water treatment plants, rivers, and reservoirs to provide practical learning
  c. Raise public awareness by promotion in public
    i. Launch nationwide campaigns on water-saving tips and the importance of clean water

ii. Engage influencers and community leaders to spread awareness on responsible water use
iii. Use billboards, posters, and public events to highlight water conservation messages
iv. Encourage corporate social responsibility (CSR) programs where businesses promote water-saving practices
v. Host public forums and seminars to discuss local water challenges and solutions

d. Providing individual benefits of good water management such as subsidies
   i. Offer tax breaks or subsidies for households/businesses using rainwater harvesting or water-efficient appliances
   ii. Implement tiered water pricing where lower usage leads to lower bills, encouraging conservation
   iii. Provide grants or low-interest loans for farmers adopting drip irrigation or other water-saving techniques
   iv. Reward communities with the best water conservation records through public recognition or funding
   v. Introduce rebate programs for replacing old pipes, fixing leaks, or installing water-saving devices
e. Promotes Sustainable Water Management Practices
   i. Encourages the adoption of climate-resilient agricultural techniques such as drip irrigation and rainwater harvesting to reduce water waste
   ii. Supports the implementation of Integrated Water Resource Management (IWRM) frameworks to balance economic, social, and environmental needs
   iii. Recommends the restoration of wetlands and natural watersheds to enhance groundwater recharge and flood mitigation
   iv. Calls for the reduction of water-intensive crop cultivation in water-stressed regions, promoting alternative drought-resistant crops

h.

TOPIC 1 - MAFIA

- We aren't exactly the Italians.
- Not much of a stakeholder in terms of the MAFIA

HOWEVER

- Yemen's a key drug, arms and human trafficking hub.
    - The MAFIA traffics drugs.
    - They also traffic humans. What a shocker!
    - Houthis controlling too many ports contributes to the despicable nature of shipping

- This means they *might have shipped some stuff in from Yemen.*
    - *UNODC organizations/terrorist groups site*
    - Many confiscated weapons by the Direzione Investigativa Antimafia (Italian antimafia police) had Arabic printings on them. These weapons were purchased by Camorra, a mafia group notorious for their involvement in the COCAINE trade and for working with Al-Qaeda. Weapons confiscated in Italy itself.
        - Yemen has the weakest port security throughout the Middle East, and considering that the weapons had Arabic printings, so its very likely that these firearms were shipped in using Yemeni ports
        - Al-Qaeda also operates in Yemen, so this is a very plausible conclusion in terms of mafia outsourcing

How is Yemen related to Italian mafias?

- Yemeni port security is horrible, meaning that Houthis, Al-Qaeda, and other terrorists can ship items through Yemeni ports.
    - Major ports such as Hodeidah, Aden, and Mukalla are primary hubs for illicit goods transport due to poor regulation, Houthi control, and Yemeni civil unrest.
    - This is also accounting for Yemen's heavy corruption.

- Yemen is also a front for drug trafficking. It is a major destination on the heroin route, and possibly the cocaine route.
    - Italian mafias import Afghan heroin using Yemen as an intermediate destination. (*seldom, mainly via Balkans*)
    - Drug trafficking is illegal in Yemen, punishable by up to death, but such cannot be enforced as ports are controlled by Houthi terrorists

- Major mafias such as 'Ndrangheta also have ties with Al-Qaeda, and use Yemen's weak border security to pass weapons through its ports and an Egyptian supplier, through the Suez Canal, to reach Sicily, the main site of mafia operations.
    - This was mentioned in the UNODC report about the link between the mafia and terrorism, citing Al-Qaeda and Al-Qaeda In The Arabian Peninsula's ties with Camorra and 'Ndrangheta.

On screwing the mafia in Yemen (and the Houthis)

- Yemen needs:
    - better border security
    - secure ports
    - an attentive coast guard
    - to get the Houthis outta here
- We could:
    - ask for American involvement in Yemen to kick the Houthi militia out of Yemen
    - request the DIA to provide anti-mafia intel to the Yemeni coast guard, intercepting Afghan imports of heroin and weapons
    - ~~assassinate the Houthi leaders~~
- The UN could:
    - get Interpol to rebuild Yemen's coast guard
    - fund a drone program around Yemen's coast, marking ships
    - assist Yemen in mandating a security inspection of each container on each ship, inside and out, catching anything and everything.

Statistics

- 90% of heroin worldwide comes from Afghanistan.
    - 5-10% of this heroin is shipped through Yemen (use 10% as a high)
    - Currently, most heroin is shipped via the Balkans (approx. 80%)
        - Due to improving legislation there however, suppliers are turning to Yemen as a backdoor to ship heroin through.
- Al-Qaeda, a major supplier of weapons for the Mafia, outsources their weapons through the Taliban in Afghanistan.
- 12% of seized weapons by the DIA from Camorra had Arabic markings, likely due to Yemen's ports being badly secured.
    - Funny thing is that the United States sanctioned Yemeni officials earlier. Are they helping us or hurting us?
- According to the OECD, Houthi-controlled ports have become open drug markets.
- UN article 2216 has demanded the Houthis to leave Yemen and relinquish their arms.
    - That clearly hasn't happened.
    - Houthis get their guns from Iran.
- The Italian mafias benefit from human trafficking. Yemen is a key hotspot for human trafficking.
    - The mafias make a profit of 300 million Euros from the debt bonds of human trafficking (Worldwide, not just Yemen) from human trafficking

OVERACHIEVER COMBAT

Possible POIs from GSL

-

“Does the delegate of Canada not realise that by this resolution, the authority over entire operations pertaining to your goal of preventing recruitment into the mafia is left in the hands of P5 countries, who, at many occasions, have been shown not to be the most trustworthy countries, and that banking on them has the potential for the complete failure of your resolution?”

AGAINST SPEECH FOR RESO

Honourable chairs and distinguished delegates,

Some parts of this resolution inherently don’t make sense. Some parts are unintentionally giving five out of 195 countries too much power.

Delegates, it is not just obtuse to allow for the passing for this resolution, it is inherently wrong to allow for its passing.

We cannot leave the authority of this operation to the Security Council - because by doing that, countries such as the United States are left with too much power over operations that change the whole landscape of criminality worldwide.

History has only shown that leaving the few with too much power never succeeds

Opening Speech #1

As the great visionary Martin Luther King once said, “Our lives begin to end the day we become silent about things that matter” - Jason

Honourable chairs and distinguished delegates, - Jason

There goes an old saying that the road to hell is paved with good intentions. Resolution 2216 passed by the UN Security Council in 2015- a decade from today - declared an arms embargo on Houthis in Yemen. - Abhijay
However, at present Yemen remains the highway to hell for human, drug, and weapons trafficking - not merely to Italy, but also worldwide. - Jason

Houthi-controlled ports are currently a front for 10% of **all** heroin exported from Afghanistan to Europe and Italian mafias, over a third of weapons shipped to the Camorra, and 300 million Euros worth in human trafficking per annum. This comprises a fire sale of national sovereignty; far from what Yemen deserves.
- Abhijay

In fact, the ‘Ndrangheta mafia profited 60 billion euros the same year Yemen faced airstrikes which incapacitated our coast guard. Airstrikes fall short of eradicating Houthis and Mafias, and instead turn Yemen into a terrorist post office for mafia weapons, the Houthis’ toll booth on drugs, and a series of resolutions turned to crimes. - Jason

The delegation of Yemen calls upon this congregation to put an end to our misfortunes and join us in the race to stop the Mafia and quench domestic terrorism. - Abhijay

General Speaker’s List #1

Honourable chairs and distinguished delegates, - Abhijay

Sun Tzu wrote that the supreme art of war is to subdue the enemy without fighting, which is evident, for despite decades of fighting Houthis and mafias, such associations haven’t stopped at all. - Abhijay

The delegate of Yemen would like to once again, bring up the sustenance that keeps the Italian mafia running - not the primary Balkan route, which will inevitably be shut off, but rather advocates for the closing of its backdoor, the Yemeni route. - Jason

The teachings of Sun Tzu extend to this discussion today, for while fighting has ensued in Yemen, the Houthis, Camorra, and ‘Ndrangheta have mastered the art of war - subduing us, their enemy without a single bullet fired. - Abhijay

Today their impunity extends via: - Jason

- the heroin backdoor that Yemen has become, importing 10% of all heroin worldwide, through port of Hodeidah - Abhijay
- the weapons pipeline that has become of Yemen, a hotspot for Arabic-marked weapons, sought after by the Camorra and the ‘Ndrangheta - Jason
- the hundreds of millions of euros illegally gained via the human trafficking central that Yemen has become. - Abhijay

They don’t fight our drug and customs laws. They simply reroute using our war as a backdoor, setting up contingency amidst our peril. - Jason

We thus issue this battle plan, urging for deployment of the NATO Maritime Interdiction Force in Yemeni waters, and for the establishment of an INTERPOL task force for weapons and drugs of Arabic origin.
- Abhijay

The writing is on the wall - while this council convenes in such talks, the mafia and associates are out waging socio-economic warfare on ***our*** people. Such organizations have turned Yemen into a criminal superhighway, wherein our inaction comprises their greatest weapon. - Jason
Thank you. - Jason

MOD1 - Links Between Mafias & Terrorists (Houthis) - 110s

Honourable chairs and distinguished delegates, - Jason

*The connection between the mafia and terrorism, especially by the Houthis, is **not** theoretical; it is operational, profitable, and deadly. - Jason*

For example, in 2023, the DIA had seized a multitude of weapons from the Neapolitan mafia, aka the Camorra. A portion of these weapons, with the UNODC not having disclosed the exact figure, had Arabic markings, indicating that such are of Middle Eastern origin, especially considering Camorra's relationship with Al-Qaeda. - Abhijay

Since Al-Qaeda operates in Yemen, and Al-Hudaydah, the major port occupied by Houthi insurgents, has the weakest security throughout the Middle East, it is only plausible to assume that Houthi-occupied Yemen was used to traffic these weapons, paired with heroin, which was shipped to Italy. - Jason

Consider this - if Camorra and Al-Qaeda are transporting weapons and drugs through Houthi-occupied Yemen, only God knows what else could flow through those ports. - Abhijay

Terrorist funds? - Jason
Stolen aid meant for the legitimate people? - Abhijay
Advanced missiles? - Jason

The Houthis only profit from this trade by taxing the trade, simultaneously posing as so-called 'freedom fighters', supported by Iran and Russia. - Abhijay

*Let's be clear. A group that shares a supply chain with Al-Qaeda and the mafia is no resistance movement. It is a terrorist syndicate that only complicates **our** work in the Red Sea. - Jason*

Yemeni legislation is meaningless when the Houthis are the port authority in Al-Hudaydah, exacerbated by failed military action since 2015, aimed at removing an airstrike-resistant terrorist group. - Abhijay

*This is **not** just insurgency. This is organised crime at its finest, with a jihadist veneer. While our legislation only gathers dust, Al-Hudaydah is a mafia freeport. - Jason*

So, we ask DISEC today if we will finally mandate inspections, at least at the Suez Canal, incarcerate enablers, and follow the trade as we choke it, or if we will only write resolutions that continue to be used as terrorist shipping manifests? - Abhijay

The delegation of Yemen yields the floor to any and all POIs. Thank you. - Jason

Bullying Simulator: Pre-written POIs

ITALY

- *Notably in 2023, the DIA had carried out mass action against mafias such as Camorra and 'Ndrangheta. Why hasn't there been any more action that at the very least, we know of that has happened between 2024 and 2025?*

USA

- *Does the delegate of the United States agree that stopping the Houthis and closing off Yemen as a weapons and drugs backdoor is critical to ensuring that the mafia has no more routes to import illegal goods through?*

MEXICO

- *El Chapo's Sinaloa cartel makes billions of USD per annum in the drug trade. Simultaneously reports have also shown that Mexico is used as a hiding place for mafias such as the Ndrangheta. Seeing as these cartels are also trafficking drugs and weapons to the Sicilian mafia, does the delegate agree that Mexico is no longer a mere 'transit country', but rather a fully-fledged mafia state?*

COLOMBIA

- *Colombia is the largest producer of cocaine worldwide. Since locally-based cartels oftentimes work closely with mafias such as 'Ndrangheta and Camorra, what existing legal measures, and if so, proposed legislation exists to shut off the Colombian cocaine farm to non-state actors?*

SOMALIA

- IMPROMPTU

EGYPT

- IMPROMPTU

SAUDI ARABIA

- *In 2019, Saudi Arabia was placed on a blacklist by the EU referring to money laundering and terrorist financing, requiring EU banks to conduct intensive checks on funds coming through Saudi Arabia. This includes money that was laundered in the interest of the Italian mafia, considering that Italian mafia bosses have admitted to using the Middle East as a hub for money laundering. Why has the Saudi government, of whom was also indicted for money laundering in 2017, not tightened enforcement of money laundering legislation despite its already established anti-corruption body and legislature related to the crime, considering that 5.74% of its GDP comes under fire in relation to the crime?*

UK

- IMPROMPTU (101% chance of POI)

CHINA

- *The Cosa Nostra and Camorra, as per DIA reports, were shown to have used Chinese underground banking to transfer 'dirty money' and assets related to illicit trafficking. Notably, in 2024, Italian financial police had uncovered approximately 2 billion euros in dirty money that was said to have been processed using Chinese shadow banking. Why was it Italian police that caught onto Chinese financial crimes? Why didn't the Chinese government take action against crimes that took place within its own territory, given the so secure nature of Chinese finance?*

INDIA

- IMPROMPTU

JAPAN

- IMPROMPTU

CANADA

- IMPROMPTU

RUSSIA

- *The Russian Federation is known as a primary route for Afghan heroin to travel through in order to reach Europe, where it is distributed and exploited by mafias. Albeit that arrests were seldom made, Russia remains a primary route for Afghan heroin (the Balkan route). Why hasn't there been more action towards securing the border as for heroin to be unable to travel via Russia?*

PAKISTAN

- IMPROMPTU

IRAN

- *As per UN Security Council reports, the Iranian government is both a supplier of weapons for, and a staunch supporter of the Houthis, a terrorist group, who in effect allow a backdoor for the Mafia's drug and arms trade, with Iranian ships, as per the same report having been parked in Al-Hudaydah. Does the Iranian government **deny** that its support of the Houthi regime enables both the mafia's backdoor in Yemen **and** terrorism?*

TURKEY

- IMPROMPTU

UAE

- *In 2021, the mafia boss Raffaele Imperiale was arrested in Dubai. He had admitted to using the UAE as a hub for money laundering for what reports would call 'a very long time.' Considering that reports like this have been persistent in placing the UAE into the mire of being dubbed a 'criminal safe haven', why hasn't there been more action against Italian mafia bosses such as Imperiale who covertly operate in your jurisdiction, and why not earlier, as Imperiale had moved to the UAE back in 2013?*

DJIBOUTI

- *Djibouti loans land to 7 different militaries, one of them being China, who has been accused of processing Mafia payments via its underground banking system, simultaneously conducting a campaign against these funds that can be called mediocre at best, especially as Italian authorities intercepted the aforementioned Chinese funds. What does the delegate of Djibouti propose to prevent its ports along the Bab-el-Mandeb strait from becoming the next Al-Hudaydah for the mafia?*

AUSTRALIA

- IMPROMPTU

MALTA

- *Malta has a notoriously corrupt government which has been repeatedly underscored in multiple reports from Transparency International, an organisation dedicated to mitigating global corruption. If the delegate of Malta attempts to fix the mafia crisis plaguing its territories, shouldn't it first tackle the issues that plague its government with the inability to act against these mafias through measures such as anti-corruption legislature?*
- *Follow up if Malta blames it on the mafia: Does this delegate not realize that in 2015, the former PM, Joseph Muscat, was shown to have privatised a number of hospitals in Malta, for his own personal gain as evidenced in the contents of leaked emails between the PM and the Swiss firm Accutor who reimbursed him after the enactment of the privatization?*

YEMEN FOR SPEECH

Honourable chairs and distinguished delegates,

The beneficiaries of the passage of today's resolution extend beyond the nation of Yemen, but rather are inclusive of the interests of nations around the world, from Sicily to Shanghai.

The present resolution as is inherent embodies a number of remedies pertaining to the issue at hand, among which is a defence against the illegal shipping industry, not merely confined to operations in the Red Sea, but rather worldwide.

As mentioned in prior speeches, this alludes to our philosophy of 'two birds, one stone', explicitly as the present resolution lobbies for the deployment of the NATO Maritime Interdiction Force around the Yemeni coast. Such allows for the subversion of not only Houthi attacks, but also inhibits the illegal shipment and trafficking of arms, drugs, and innocent souls.

This panders to the inherent truth that the time for exclusively soft intervention has passed, which makes it imperative to cull the crisis that plagues our waters and therein people with the appropriate force.

The delegate of Yemen speaks for the whole of Blocbardiro Crocodilo when it pushes for the passing of this resolution

Against speech POIs

The delegation of Colombia suggests for soft measures, advocating against these hard measures despite the fact that those measures have failed consistently against its own cartel. When faced with this inefficacy, isn't Colombia's proposal to a degree, hypocritical, considering their desire to quench the cartel - especially as Colombia itself has used hard measures such as SWAT teams on these cartels?

11 word POI: Colombia failed to eradicate cartels using soft power. Your proposal's hypocritical.

FRIEND POI

Does the delegate of Japan agree that the intervention by the NATO Maritime Interdiction Force around the Red Sea is critical to ensuring the collapse of mafia groups?

UNFREND POI
The delegation of Canada expresses its displeasure with the hardline anti-mafia motion. Does this delegation, in effect, believe that their idea of a valid solution is solely to prevent the recruitment into the mafia, forgoing the fact that the mafia itself must be dealt with as well?

FREND POI SOUTH KOREA

UNFREND POI AGEIN

Does this delegate believe that an investment of 800M USD, funds seized from the Ndrangheta, would be a sufficient amount for maintaining the Delulu body?

Opening Speech #2

Honourable chairs and distinguished delegates, - Jason

Since 2008, the UNSC has passed 7 resolutions regarding piracy, yet unfazed by the latest UN action, the Red Sea faces the height of its peril, not merely from Somali pirates, but more prominently so by Houthi terrorists equipped with Iranian missiles, who have attacked over 100 vessels passing through the Yemeni coast between 2023 and 2025. - Abhijay

Resolutions without enforcement are ink on water. - Jason

This delegation would like to bring to light three major UN and NATO actions: - Abhijay

- Res. 1816, an official but ineffective condemnation of Horn Of Africa maritime piracy -Jason
- Res. 2216, a demand for the Houthis' vacation of Yemen - one that has aged like milk as Houthis persist to operate on Yemeni soil. - Abhijay
- Operation Ocean Shield, an effective albeit short-lived anti-piracy initiative that instead left Yemeni forces outnumbered and outgunned. - Jason

The Houthi mining of Yemeni coast guard vessels, fishermen kidnapped by pirates with little to no retribution, and those who do hold power in the area only react, never acting. - Abhijay

The delegation of Yemen would like to re-establish that the Houthis read such resolutions as fantasies. Yemen requires warships, lest this council assents to a world where life is subordinate to ink. - Jason

Thank you.
Paste here ICEMUN HRC Script

General Speaker's List #2

In 2023, UN Secretary-General Antonio Guterres declared that "without maritime security, there can be no global security"

Hon. chairs, distinguished delegates, - Abhijay

They say that a rising tide lifts all boats, but in the Red Sea, such a tide is stained blood red.
Since the enactment of resolution 2216, Yemen has only become a pyre for piracy. - Jason

Houthis have sunk our Coast Guard, attacked over 100 vessels in the last two years, and became a catalyst of terrorist piracy in Yemeni waters. - Abhijay

Yemen demands **action**, not words. - Jason

The failures of this Council have spoken louder than any Houthi strike on innocent civilian vessels - producing merely a set of resolutions that dissolve like salt in water: - Abhijay
Allowing for: - Jason

- condemnations without consequence - Abhijay
- sanctions forgetting financial backdoors - Jason
- And abandoned operations leaving Yemen outgunned - Abhijay

Yemen believes that our socioeconomic placing at 186th/193 countries in the HDI index paired with our proximity to major shipping routes 1. incentivizes and 2. provides sufficient range for Houthis to conduct Red Sea attacks. Alluding to the fact that maritime piracy does not necessarily occur in other impoverished nations, this delegation would thus like to underscore this undeniable truth which renders soft intervention largely inefficient and ineffective - Jason

Yemen calls for: a permanent, hard-line motion against Houthi and Somali pirates - Abhijay

- joint provision of destroyers, battleships, and frigates to Yemeni forces - Jason
- strict enforcement of resolutions including but not limited to r. 2462, 2722, which ensure the defunding of pirates. - Abhijay

The Red Sea is the artery of the world, which only further hemorrhages the longer we leave it in Houthi hands. The delegation of Yemen calls upon this council to unite, regardless of diplomatic ties, in ensuring the safety of sailors worldwide from acts of terrorism. - Jason

Thank you. ***The delegate yields the floor to POIs pertaining to the speech.***

MOD2 - Red Sea Crisis//Terrorist Financing//UNSC Reso 2462 - 110s

Honourable chairs and distinguished delegates, -Jason

UNSC resolution 2462 was explicitly written to ban the financing of internationally designated terrorist groups. - Jason

Today, however, Yemen stands at the brunt of the Red Sea crisis, primarily due to its situation around the Yemeni coastline, and it is only exacerbated by the finances that the Houthis are receiving from Iran. - Abhijay

So far, the Houthi insurgency has attacked over 100 vessels in the Red Sea since 2023, including naval vessels from multiple countries, including Yemen itself - notably with the recent sinking of a Liberian-flagged cargo ship only a few days ago. - Jason

Their actions have disrupted international trade, forcing all vessels to go from Europe to Asia via South Africa, just to avoid the potential of an attack from terrorists. - Abhijay

And for the vessels stuck in the Red Sea, sailors cannot sleep peacefully at night due to the looming threat of Houthi shelling. - Jason

*Delegates, this is not just a regional crisis. This is a global economic chokehold enabled by systemic **violations** of international law. As resolution 2462 gathers dust in NYC, the Iranians continue to dock in Al-Hudaydah, unloading not just weapons, but the financial lifeline that sustains this maritime terrorism. - Abhijay*

*The cost is **unbearable**. - Jason*

- *Vessels from 65 countries have been forced to reroute around Africa, at unspeakable cost. - Abhijay*
- *Red Sea shipping insurance costs have skyrocketed, forcing 12% of international trade to be delayed. - Jason*
- *Many tonnes of humanitarian aid towards Yemenis and Palestinians have been delayed, only worsening their lives. - Abhijay*

Yemen demands that immediate action be taken. - Jason

The tools exist. The laws have been passed. The only question is if this Council is courageous enough to implement them with enough force to make the Houthis submit, - Abhijay

or if we will continue to let sailors live in fear of their lives while passing through the Red Sea. - Jason

The delegate of Yemen opens the floor to all POIs. - Abhijay

Bullying Simulator: Pre-written POIs

ITALY

- nah nun much needed here lol

USA

- *On the 6th of July 2025, the Liberian-flagged ship Eternity C was sunk in the Red Sea, notably after the United States had reduced operations in the area, with the departure of USS Harry S. Truman on the 17th of May 2025. Does the delegate of the United States admit that its reduction of naval operations in the area is only allowing the Houthis to continue their terrorist operations with near-guaranteed impunity?*

MEXICO

- What does mexico even have to do here (impromptu)

COLOMBIA

- What does colombia even have to do here (impromptu)

SOMALIA

- *In 2009, a crew of four pirates led by Abduwali Muse hijacked the Maersk Alabama for financial gain, proving piracy to be a profitable industry, especially considering that around that 2010 the average ransom paid was around 5.4 million USD, an all time high. Pairing that with recent Somali pirate attacks on Yemeni vessels, does the delegate of Somalia believe that it is crucial to implement stronger naval measures around the coasts of Somalia and Yemen, and if so, propose any measures in doing so?*

EGYPT

- *Seeing as the Suez Canal has been impacted by the 2023-2025 Red Sea crisis, what measures could the delegate propose to ensure the safety of the Red Sea, especially considering the fact that Egypt is one of the strongest countries in Africa?*

SAUDI ARABIA

- *Notably in 2019, the Saudi government led a coalition to combat the Houthis, a major ally of maritime pirates. The coalition's attacks on Yemeni soil led to numerous noncombatant casualties, destroying Yemen's economy and creating what is probably the biggest opportunity for the Houthis and Somali pirates to attack. So when the delegate of Saudi Arabia condemns piracy, is it just a cover-up for their war crimes?*

UK

- *The UK supplied 9.7 billion GBP worth of arms to the Saudi coalition (8.2B to Saudi Arabia alone) which bombed Yemen, creating what the UK's own CAAT report dubs 'the world's **largest** humanitarian crisis, only fuelling the birth of today's Houthi-led piracy crisis. By condemning piracy and Houthi involvement in the Red Sea, isn't this to a degree, hypocritical, as the UK only benefited economically from the war in Yemen?*

CHINA

- *Nearly 60% of Chinese trade flows through the Houthi-threatened Red Sea. However, on numerous occasions, China decided to abstain from voting on key resolutions such as 2722, which demanded the Houthis cease attacks on Red Sea vessels, including on a Chinese oil tanker, which was struck by Houthi missiles in 2024. What exactly is China trying to protect by refusing to vote on resolutions that only affect it positively?*

INDIA

- *80% of Indian trade flows through the Red Sea, but amidst the ongoing Red Sea crisis, the Indian government has not taken any action to combat the crisis perpetuated by Houthi terrorism, despite their trade practically relying on the body of water. Simultaneously, India imports 13% of its oil from Iran which is the Houthis' strongest supporter, while sending warships to Somalia as their own vessels are attacked by the Houthis. Is this hypocrisy, cowardice, or a secret trade agreement?*

- *Despite the fact that India is plagued with internal issues such as the caste system, corruption, and its struggling infrastructure, India is heavily involved in the action against piracy off the coast of Somalia. How can the Indian government expect to solve the issues of other countries despite failing to solve its own internal crises?*

JAPAN

- *As per a CSIS estimate, 32% of Japanese imports and 25% of Japanese imports flow through the Red Sea, which, not to reiterate the obvious, is under attack by Houthi terrorists. Since such a significant amount of Japanese trade is reliant on the Red Sea, and a Japanese-operated cargo ship was hijacked by the Houthis in 2023, why hasn't there been more action from Japan aside from mere condemnations?*

CANADA

- IMPROMPTU

RUSSIA

- *In 2018, the Russian delegation at the UNSC vetoed a resolution aimed at blocking Iran from supplying weapons to the Houthis. Today, those same weapons that Russia allowed to flow arm terrorists with the capabilities to attack civilian vessels passing through the Red Sea. Does the delegate of Russia still believe that this veto 'preserved regional stability', or that it guaranteed the next generation of terrorists to work scot-free, with the blood on Russia's hands?*

PAKISTAN

- *Pakistan is conducting anti-piracy operations off the coast of Somalia, but in 2024, it decided* ***not*** *to act on the Red Sea crisis off the coast of Yemen, against Houthi insurgents attacking civilian vessels. By doing this, is Pakistan attempting to avoid Iran's ire while sailors suffer, especially considering that Pakistan's close ally, Djibouti is situated only 32km from the coast of Houthi-occupied Yemen?*

IRAN

- *The government of Iran is known to provide funds to the Houthi insurgency, an internationally designated terrorist group. This is in violation of UNSC resolution 2462. Does the delegate of Iran condone the unspeakable acts of terror that have been committed against innocent sailors by their funding of the Houthis, and in turn, Somali pirates?*

TURKEY

- IMPROMPTU

UAE

- *In 2019, the United Arab Emirates was part of a coalition led by the Saudis which ended up killing many noncombatants, while only giving the Houthis a catalyst to attack on. The Yemeni delegation would formally like to ask the UAE if they truly condemn piracy, or are unintentionally encouraging it?*

DJIBOUTI

- *Djibouti is known for its aim to become a shipping hub, controlling the Bab-El-Mandeb strait. However, Djibouti-based entities have been providing material assistance to the Houthi terrorist group, especially considering at closest, Djibouti is 32km away from the coast of Houthi-occupied Yemen. Alongside that, Djibouti is known for loaning land to 7 different countries' militaries. Is Djibouti maintaining its purported neutrality, or is it just auctioning off entropy to whoever bids the highest?*

AUSTRALIA

- *Australia commands its own Red Sea task force to secure the Red Sea for trade, against the threat of Houthis, yet China is the source for 32.5% of all Australian exports. These resources, including iron ore and natural gas are only boosting the same economy that funds Iran, and in turn, the Houthi pirates. Is Australia's condemnation of piracy just a cover-up for the fact that Australia is profiting from both sides of the war?*

MAIN SUB SPEECH (write easy POIs)

Honourable chairs and distinguished delegates,

Yemen stands before this committee to address the passage of this resolution, our big, beautiful bill.

Our big beautiful bill to stop the pirates and contain the Houtthis is not just a hard approach, it is a holistic approach, a holistic approach that benefits governments worldwide, as terrorists are apprehended and jobs are created.

In the short term, we **will** attack the Houthis and rebuild the Yemeni navy. However, with time, this bloc does not aim to persist with its hard approach, which is why we have dedicated a portion of our bill to prevent recruitment into these groups after we have revoked their right to operate, using the military and economic might of the MEDCs in this bloc, the United States and the People's Republic of China.

This is an effective, two-phase resolution.

With the passage of this resolution, the Red Sea will start to be safe again, and global trade will no longer be disrupted, as pirate/Houthi attacks dwindle exponentially, thanks to our anti-recruitment initiative.

Every clause of this resolution is designed in the best interest of our world and our people; therefore, as the main submitter, Yemen urges you to vote for the passage of this resolution.

Thank you.

POIs for Main Sub Speech: (just pick any of the following if u get picked):

WHICH ONE HAVE YOU GUYS NOT ASKED YET????

- How can we ensure that the proposed military interventions and the enforcement operations in the Red Sea are carried out in the way that respects the sovereignty and territorial integrity of the coastal states and residents?

  As per the resolution, most military operations will be conducted in international waters, such as the Bab-el-Mandeb Strait. However for at least the time being, we consent to access to our waters
  TYSM
- ASKED
- What mechanisms can be put in place to ensure transparency and accountability of the distribution of military equipment and the resources to the affected regions, how can we prevent diversion or misuse of these assets?

- The resolution proposes to use satellite imagery and data-sharing to track and dismantle pirate mother ships. What privacy safeguards can be implemented to protect the right of the innocent manners whose movements may be monitored?

- How would the resolution ensure the efficiency of re-allocation of money in clause 4c given that corruption is rampant?

For speech by Canada:

Canada

consider how GPS is good for real time position expose and Beidou is excellent at accuracy, they make a very perfect combination!!!

Honourable Chairs, Esteemed Delegates,

Clause 2 is our high-tech pirate detector — think of it as GPS for justice. With sub-clause 2a, we're using satellites like Beidou and GPS systems not just to find pizza places, but to spot pirate motherships behaving in suspicious manners.

Sub-clause 2b? Coast guards roll in from 500 meters out, binoculars up, ready to say: "Not today, pirates."

And sub-clause 2c makes sure we share this data in real-time with trusted local governments — because teamwork makes the pirate dream… sink.

With UN funding and smart enforcement, we're not just watching the waves — we're owning them. So let's pass Clause 2 and therefore this solution should be passed in the name of god.

Friendly POIs for Canada's for speech:

- The resolution calls for the deployment of enhanced drone surveillance to track pirate motherships. Can you provide more details on the safeguards that will be in place to ensure these drones are used responsibly and do not infringe on the privacy of legitimate mariners?
- Clause 4 outlines plans for the rehabilitation and reintegration of captured pirates. Can you elaborate on the specific training and education programs that will be offered, and how you will ensure these initiatives are truly effective in preventing recidivism?
- Clause 5 mentions the provision of "short-term aids" such as funds, technology, and medical equipment. Can you clarify how the distribution and utilization of these resources will be monitored to ensure transparency and prevent misuse?

For speech by South Korea

The precision in which Clause 2 is composed is simply impeccable. Clause 2 consists of a standardised and defined procedure on the methods to dismantle pirate motherships.

As stated in South Korea's previous speeches, the sharing of satellite technologies is a form of information sharing that also encourages international cooperation. Clause 2 suggests that satellite systems be utilized for navigation of motherships, utilizing USA's GPS system which provides real time position of suspected vessels and China's Beidou satellites for their incredible accuracy, noting a clear tactic to identify mother ship behavior to ensure accuracy.

With motherships taken down and dismantled, other ships of pirate fleets would be forced to retreat back to ports or their origin due to lack of supply, therefor ensuring those pirates are prevented from extending their operation capabilities and ranges, rendering them unable to conduct illicit piracy activities, settling the short term troubles of Pirates almost completely and swiftly.

This delegation urges all delegates to SLAY THE QUEEN!

HEY CANADA
We will try to ask a poi related to clause 2 (the mother ships one) and if you want to answer you can just repeat snippets of our speech (up there)
Right, sounds ok, but perhaps we can stick to the written friednly pois first? Okay thank uuuuu
Thankssss ;)

For speech of Japan

Clause 4 states that money

MAIN SUB SPEECH (write easy POIs)

Honourable chairs and distinguished delegates,

Iraq stands before this committee to address the passage of this resolution, our big, beautiful bill.

Our big, beautiful bill to criminalise abortion and stop the murder of innocent children is not just a hard approach; it is a humane approach, a humane approach that benefits millions worldwide every single year, protecting the God-given gift of life.

Clause 1 urges nations to recognise abortions, to first and foremost protect the fetuses directly. However, with time, this bloc aims to continue by pushing clause 3, which we have employed and have dedicated a portion of our bill to protect and provide financial and physical support that is funded directly from the United Nations. Furthermore, specified in clause 2, we hope to provide education that will teach the younger generation about contraceptives and safe sex to prevent these urgent and unwanted abortions in the first place.

This is an effective, two-phase resolution that addresses these ethical concerns.

With the passage of this resolution, abortion will start to be criminalised with safer exceptions, following our own beliefs, and dwindle exponentially, thanks to our initiatives.

Every clause of this resolution is designed in the best interest of our world and our people; therefore, as the main submitter, Iraq urges you to vote for the passage of this resolution.

Thank you.

Opening Speech #1

As the great visionary Martin Luther King once said, “Our lives begin to end the day we become silent about things that matter”

Honorable chairs and fellow representatives,

The delegation of Mali stands before this assembly demanding immediate justice for the misfortunes Western colonialism has perpetuated upon us African nations.

Despite the decades elapsed since western de-colonization, Africa today continues to endure the repercussions of colonial subjugation.

African external debt is projected to comprise a quarter of African GDP, and currently encompasses an exorbitant 50% of GDP in over half of African countries. This pillaging of our resources prevents economic growth and eliminates capital which could otherwise contribute to internal interests such as poverty alleviation and infrastructure development.

While Western countries wallow in incessant advancement and progression, us African nations have been left in the dust- our resources drained bare, and our people in poverty.

The delegate of Mali calls upon this congregation to put an end to our misfortunes- to terminate the oppressive colonial (and therein neocolonial) culture that still lingers to this day.

Thank you.

General Speaker’s List (start with solutions)

Honorable chairs and fellow delegates,

The delegate of Mali would like to propose the following solutions, recognizing that only in a world without external interference may such a reality be achieved. (ONE SENTENCE INTRODUCTION NO FLUFF)

Elaborating on the points mentioned in my opening speech, this delegate proposes that this council enacts policies fostering fair trade between Multinational and African enterprises. Multinational companies operating in Mali squander a majority of the profits derived from the extraction of Malian resources. Hence, this delegation pushes for the reform of trade procedures, which enforce the fair sharing of profits.

This delegate also proposes that African countries diversify away from western dependence and embrace eastern or pan-African economic and military collaboration. External influences- regardless of western or eastern disposition -have for centuries been responsible for the larceny that has plagued our continent. We must seek allies whom we can confide in, not those who unjustly extract our resources.

Finally, Mali proposes that this council urges western countries to compensate us African nations for the decades of oppression that have resulted from capitalist desires. Africa today lags decades far behind modern society- underdeveloped -a factor which perpetuates our reliance on foreign assistance. This delegation proposes that such funds are allocated to the improvement of African infrastructure and governance and hopes to engender sustenance for African independence and sovereignty.

Let all those who concur with Mali meet in the caucus

As many Malian sectors function in the primary sector (or in that sense function on human labor), Mali proposes that governmental emphasis on such industries which inherently require little training may allow Africa's and therein Mali's economy to prosper.

Since majority of african countries are poor, where does mali get financial backers? African countries can seek eastern powers such as the Russian government, Wagner group or China for financial assistance

Are you concerned with russia and china's tendencies to form puppet regimes? Even if these governments maintain notoriety for their tendencies to manipulate and form puppet states, this comprises a mere shift from subjugation by one monster to another monster.
Mali's geographical location

How will fair sharing of profits go?

1. Reforming trade procedures and framework
2. Collaborating with non western countries
3. Investing in governance and infrastructure in Africa

Spam solutions here
90s speech

1 solution per

Opening Speech #2

Honorable chairs and fellow delegates,

The delegate of Mali calls for all nations to put aside their national interests and instead focus on an international effort to provide clean, sanitary water for southeast Asian countries.

As a nation suffering from its own water crisis, Mali strongly believes all nations should be held accountable for any exploitation of transboundary water sources that could potentially impose a negative impact on other nations.

In recent years, Chinese dams have reduced the Mekong's wet-season water flow by 40%, contributing to the river's lowest recorded levels in 2019 which in turn has wrought a range of adverse impacts on the livelihoods of millions who reside in downstream nations.

Therefore based on experience from the **African Ministers' Council of Water established in 2002**, Mali calls upon this council to establish a legally binding body/committee to ensure that all nations associated with the Mekong river can have a say with regards to the management of transboundary water sources. In addition, this delegate would like to emphasize his support for the Strengthening of the GWP-SEA's role as a way to reduce conflicts over water.

The delegate of Mali anticipates fruitful debate during the discourse of this assembly.
(Global Water Partnership - Southeast Asia)

General Speakers' List #2

Honorable chairs and fellow delegates,

The delegate of Mali would like to propose the following solutions, recognizing that any remedy to the water crisis in southeast asia must be multinational as well as binding.

Following our strong position on local empowerment, the delegate of Mali proposes the initiation of technical training programs and policy workshops, facilitated by the GWP-SEA, to educate engineers and local officials across the Southeast Asian region on water management and ethical practices.

Mali (as mentioned in this delegate's opening speech) also calls for the establishment of a legally binding body/committee which will ensure that all nations associated with the Mekong river have a say in the management of transboundary water sources.

Such measures would foster accountability on water management by obligating nations to share data transparently with each other. Upstream nations would also be required to consult with affected countries before the construction of major infrastructure (e.g. dams), as well as comply with dispute resolution mechanisms.

This delegation also recommends the provision of finance and sharing of technology between Southeast Asian nations and beyond. This follows in the footsteps of past actions the African Water Management Committee has taken, which has historically proven to ensure North African Nations have an over 90% access to sanitary and safe drinking water.

This delegate believes the securing of sanitary and abundant water access for all nations involved in the course of the Mekong river must be derived from a combination of financial investment and knowledge transfer between nations associated with the Mekong river.

Let all those who concur with Mali meet in the caucus.

General Speaker's List #1

Honorable chairs and esteemed delegates,

Nine of the top ten countries that invest in AI are members of the G20. While LEDCs struggle to spare funds, MEDCs blindly throw cash at the industry, with the top 10 countries' investments alone totalling to $695 billion USD.

This stark disparity in investment, and thereby the exponentially growing AI development deficit leaves LEDCs lagging far behind in the AI race, forcing us to use MEDC-owned AI models such as Deepseek, Gemini, or ChatGPT.

As such, let it be established that Artificial Intelligence will soon serve as a medium of digital neocolonialism, and with global dependence on AI set to surge exponentially in the near future, entire economies or education systems face the threat of being toppled by mere changes in Terms and Conditions.

The threat of cultural homogenization that comes with providing AI-based education . This delegation calls for internationally binding legislation that protects states' jurisdiction to regulate use of foreign AI models and thereby mitigate the effects of cultural homogenization.

The effective upholding of such legislation makes it imperative for an LEDC-led AI coalition to be established. Such can facilitate negotiation and oversight over such legislation, as well as the sharing of resources such as funding or research that could lead to potential detachment from the market's current MEDC domination.

An LEDC-led coalition protects our interests, directly addressing the investment gap and dissolving the economic barrier which will keep the LEDCs of today LEDCs for centuries to come.

Let all those concur meet in the caucus.

GSL: (speech was done off bullet points impromptu)

stabilize venezuela

>ECONOMIC SUPERPOWERS

-cancellation of all vzln debt to foreign countries (RU, CN)

-reparations for inhibiting venezuelan economic recovery; pool for development

(debt exacerbated initial crisis to current extent)

nk can help w sovereignty

>DISTANCING

-superpowers exploit venezuela for oil; USA (every middle conf.)

-33% of MNCs globally are from US, neocolonialist rule over global economy

>LONG TERM

-rejuvenate oil exports; kickstart money supply

-establish manufacturing sector; shift from primary to secondary

-sustenance established

>INFLATION: BITCOIN

(controversial ask for modcauc)

-$91,000hkd off paper trading in 1 month

-el salvador has made 180% bitcoin profit

-intuitive app and technological education;

-mitigate tech divide that inhibited salvadorians from using bitcoin wallets

BTC RECORD: 22′ dip (no sale), 24′ 67,000/coin and presently valued at over 100,000. 180% win

all those agree meet in caucus

Opening Speech #2

Honourable chairs and distinguished delegates,

Since 2013, the UNHRC has passed 4 resolutions regarding Venezuela's socioeconomic situation, yet unfazed by the latest UN action, Venezuela persists to suffer from the lingering aftereffects of 2010's initial crisis, where such is not derived from a lack of humanitarian support, but more prominently so by Venezuela's inability to provide for itself, for its lack of sustenance has proven to be the mainspring of its inability to escape the middling economic conditions it has experienced for the past few decades.

Resolutions that pander to the ceaseless provision of aid are equivalent to ink on water. - Jason

This delegation would like to bring to light three major UNGA and UNHRC actions: - Abhijay

- UNHRC Res. 42/25 of 2019, an official but ineffective condemnation of the conditions Venezuelan citizens endure.
- UNHRC Res. 57/36, a 2024 demand for the Venezuelan government to cease its human rights violations- one that has aged like milk as Venezuela . - Abhijay

The delegation of North Korea would like to re-establish that economic growth is the only way Venezuela can escape the confines of its incredibly middling situation, lest this council assents to a world which prolongs slow and lasting pain, and where life is subordinate to ink. - Jason

Thank you.

General Speaker's List #2

In 2017, UN Secretary-General Antonio Guterres declared that "There Can Be No Imposed Solution in Venezuela", and that "The way out must be found by Venezuelans alone"

Hon. chairs, distinguished delegates,

They say that a rising tide lifts all boats, but with Venezuela's excessively middling socioeconomic situation, such a tide is stained blood red.

Since the enactment of HRC resolution 42/25, Venezuela has only become a pyre of plight and insecurity.

The provision of aid from NGOs and foreign institutions such as governments, the UN, or NGOs has only served as a catalyst of prolonged human suffering.

The DPRK believes **Economic Development** is necessary for Venezuela to escape its situation, on top of existing aid.

The DPRK calls for:

- The distancing of economic superpowers from interfering in internal Venezuelan affairs
- The rejuvenation of Venezuela's oil industry, which will produce funds for economic diversification into industries such as manufacturing
- And the introduction of Bitcoin as a form of official currency, which is a direct imitation of El Salvador's past actions that resulted in a 180% profit off a 2021 investment as well as a 31% national bitcoin adoption rate.

Venezuela is an artery of global oil supply, which only further hemorrhages the longer we leave it in economic mediocrity. The delegate of North Korea calls upon this council to unite, regardless of diplomatic ties, in resolving the crisis Venezuela has faced for the latter part of modern history. - Jason
Thank you. ***The delegate yields the floor to POIs pertaining to the speech.***

Opening Speech #1

Honourable chairs and distinguished delegates,

Since 2012, NATO has passed 3 resolutions/reports regarding African stability and security, yet unfazed by NATO actions, Africa persists to suffer from its inability to compete with MEDCs, thereby nudging the region toward receiving Sino-Russian aid.

This delegate believes such is not derived from a lack of aid, but more prominently so by Africa's inability to provide for itself. Its lack of sustenance has proven to be the mainspring of its inability to escape the middling economic conditions it has experienced for the past decades, compelling Africa to turn to China and Russia when NATO countries offer less favorable deals.

This delegation would like to bring to light two major NATO actions:

- Operation Unified Protector, a security campaign in Libya which itself created a security complex NATO grapples with
- The Mediterranean dialogue, a cooperation campaign that has failed to outpace the speed of our competitors' settlements.
- *The 2012 Schmidt report, an analysis of the political climate after the Arab Spring Revolutions*

The delegate of Romania would like to re-establish that economic growth is the only way Africa can escape the influences of the Wagner group and the Belt & Road initiative's debt trap diplomacy.

NATO must provide economic opportunities which secure African sovereignty via leveraging financial empowerment.

Thank you.

General Speaker's List #1

Earlier this year, UN Secretary-General Antonio Guterres declared that "Africa is at the center of opportunity", and "most important driver of global business with a $2.5 trillion market opportunity".

Hon. chairs, distinguished delegates,

Unfazed by the imposition of NATO and UN actions, Africa has remained a pyre of plight and insecurity. The provision of aid from foreign institutions have only served as a catalyst of prolonged human suffering. Romania believes that alongside existing aid, **Economic Development** is necessary for Africa to escape its situation.

Romania calls for:

- Investment into the African primary sector to rival the Chinese BRI initiative, leveraging the world's youngest population to produce funds for economic diversification toward a secondary & tertiary economy
- The coordination of sanctions on Russian PMCs (Wagner)
- And to combat inflation, corruption, and eastern influence, the introduction of Bitcoin as a form of official African currency, a direct imitation of El Salvador's past actions that resulted in a 106% profit off Bitcoin investments & 31% national bitcoin adoption rate.
    1. Argentinian integration of Bitcoin payment into subways via a national contactless card (octopus card basically)
    2. The Bolivian presidential candidate proposing to leverage bitcoin as a hedge against inflation to promote transparency.

Africa is an artery of global economic success, which only further hemorrhages the longer we leave it in economic mediocrity. The delegate of Romania calls upon this council to unite, regardless of diplomatic ties, in resolving the crisis Africa has faced for practically the entirety of history. - Jason

Thank you. ***The delegate yields the floor to POIs pertaining to the speech.***

The continent is home to the world's youngest population, abundant renewable-energy resources and extraordinary creativity — from fintech to fashion, from agriculture to artificial intelligence. First, we must unleash the full potential of Africa's growth through the African Continental Free Trade Area. But, this requires enhanced infrastructure — roads, ports, energy grids, harmonized standards and predictable regulations. Second, we must drive a green industrial revolution. Africa's sun and wind can help power it. Yet, it only receives 2 per cent of global renewable energy investment — a glaring injustice. We need a surge in solar

and wind projects, expanded grids and storage, and universal energy access for the 600 million Africans still without power. Developed countries must honour their commitments — including doubling adaptation finance.

Opening Speech #2

At a press conference yesterday in Berlin, NATO's secretary general emphasized that "our populations must know that there is no need to panic, because NATO has a strong nuclear deterrent, to preserve peace, prevent coercion, and deter aggression."

Honourable chairs and distinguished delegates,

Like Poland, Romania is a sub-frontline nation bordering Ukraine, serving as a barrier not only to the Balkan region and Europe, but also to the rest of the world, which underscores the imminent concern this delegate holds for the topic.

Russian nuclear deployments in Belarus and its 2022 invasion of Ukraine pose an unprecedented risk for eroding European stability, and thereby every eastern flank country's national security.

This comprises a fire sale of Romania's national security, and Europe's entirety, and as such this delegate calls for enhanced cooperation with Romania to exacerbate the effect of the nuclear deterrent's **aura.**

With the pace of Russian advances in these past few years, growing Russian confidence has gradually eroded our nuclear safeguards.

The delegation of Romania calls upon this congregation to put an end to our misfortunes and cooperate with us in the race to curb Russian geopolitical advance.

General Speaker's List #2

Sun Tzu wrote that the supreme art of war is to subdue the enemy without fighting, which is evident- as such encompasses the inherent nature of Nuclear deterrence.

Honourable chairs and distinguished delegates,

The teachings of Sun Tzu extend to this discussion today, for while African states may be engaged in ceaseless war, NATO countries have long mastered the art of war, restraining the enemy without a single bullet fired.

In recent years, Russia has acted with elevated hostility, including

- Their annexation of Crimea and Ukraine, deployment of tactical nuclear weapons in Belarus, and strategic manipulation of African states, to name a few

To mitigate the present threat, Romania thereby proposes for:

- The maintenance of western nuclear deterrence to counter Russian expansionary objectives
- The expansion of NATO's nuclear sharing program to the eastern European flank, in particular the hosting of weaponry on **frontline** Romanian soil to exacerbate NATO's deterrent **aura**
- The development of energy and oil infrastructure to reduce Russian dependence and thereby mitigate any repercussions of noncompliance with Russian demands
- Regular military exercises in the Black Sea region to demonstrate combat readiness whilst increasing aura by responding to Russian nuclear deployments in Belarus
- The installation of Israeli-US 'Iron Dome" missile defense mechanism system in all NATO member states.

Russia doesn't fight _____. Russia simply reroutes using _____as a backdoor, setting up contingency amidst our peril.

Thank you.

Becoming target: Romania's already a target, doesn't exacerbate the threat, besides Romania is in NATO; one attack on Romania will trigger retaliation from all. No effect.

Arms race: Russia has currently enacted a modernization campaign to replace their Soviet-era nuclear weaponry, and as such this delegate believes the global west should also pursue such an initiative to bolster readiness against Russian aggression. Such ensures we can negotiate with Russia and keep our nuclear deterrent live.

I didn't write this prep my codel did and i only delled 1 day so this was like 0 effort

Honestly a horrible example of a speech

TOPIC 1: Addressing the Dangers of Grey Areas

INTRODUCTION (60s):

ill dm u a sentence on train

Disinformation campaigns, neocolonialism, and maritime harassment threaten Filipino sovereignty & livelihoods.

While a 2016 UN arbitration ruling ruled in favor of us over China, Chinese poaching continues to drain over 1.2 billion kilos of fish annually from our nation's seas: the equivalent of 10,000 Boeing 747s stacked atop each other and about 1% of global fish output.

Despite such, the UN has yet to take concrete action, and merely encouraged assent to maritime morality in Resolution 79/167 of 2024.

In fact, the Philippines imported a record 300 million dollars worth of fish from China in 2023 while our domestic fishing industry's output plummeted by 12% in one quarter alone, pushing 350,000 families into poverty.

This is undeniable neocolonialism.

The Philippines urges for enforcement of proxy actor accountability and the implementation of grey area enforcement measures which will be further elaborated upon in the GSL.

We call upon this congregation to put an end to our misfortunes and join us in the race to terminate grey area neocolonialism.

GSL (90s):

Honorable chairs and distinguished delegates.

In xxxx, the UN secretary general said xxxx

Over 200 documented maritime grey zone incidents occur annually in the South China Sea, from passive swarming, to direct attacks on vessels.

Our home waters which our fishermen and trade depend on, are no longer safe.

Amidst such incidents, the Philippines has promoted regional collaboration through ASEAN, reinforced cybersecurity, and pursued channels to expose disinformation. We aim to diversify economic partnerships to reduce vulnerability to neocolonial coercion.

To address these threats, Philippines proposes a 3-fold solution.

First, reforming international frameworks to enforce cyberattacks, economic coercion, and maritime harassment as violations of law. This closes lapses in penalty imposition, closing loopholes acting as catalysts for grey zone activity.

Second, establish accountability using flagging networks to map activity, whether maritime or cyber, in real time. This will expose fishing militias and cyberattacks, improving global security.

Third, enhance media literacy and build regional security hubs through ASEAN, allowing nations to counter the spread of disinformation while coordinating rapid responses to cyber and maritime incidents.

The delegation of the Philippines would like to re-establish that grey zone loopholes are catalysts for critical international security flaws. We call for immediate action, lest this council assents to a world which prolongs slow and lasting pain, and where life is subordinate to ink.
(speak until times up it should be fine)

Economic coercion:

- China used import bans done to Philippines such as bananas and agricultural goods etc. Uses economic influences to pressure Philippines from taking disputes to international court.

ASEAN

- Philippines, Brunei, Cambodia, Vietnam, Laos, Malaysia, Myanmar, Singapore, Thailand, Timor (east of Indonesia).
- foster regional peace, stability, and economic growth among its member states
- Philippines aims to expose China's grey zone tactics through ASEAN.

Australia

- **Stance:** Strong Indo-Pacific security advocate, wary of Chinese grey zone tactics.
- **POI:** "Australia emphasizes Indo-Pacific security, yet how effective has it been in deterring grey zone tactics in its own waters?"

Japan

- **Stance:** Maritime security ally, opposes Chinese intimidation.
- **POI:** "Japan faces maritime intimidation—how effective has cooperation with allies like the Philippines been so far?"

South Korea

- **Stance:** Concerned about cyber threats (esp. DPRK), supportive of collective defence.
- **POI:** "South Korea faces constant cyberattacks—how can ASEAN cooperation extend to Korean defence?"

India

- **Stance:** Non-aligned, balances US and China, wary of coercion.
- **POI:** "India balances non-alignment—how do you avoid being pressured by both US and China in grey zones?"

DPRK (North Korea)

- **Stance:** Rejects Western framing, accuses alliances of coercion.
- **POI:** "North Korea accuses alliances of coercion—how do you justify your own use of proxy tactics?"

UK

- **Stance:** Supports liberal order, free trade, cyber defence.
- **POI:** "The UK promotes free trade—how do you balance restrictions against coercion with open markets?"

Poland

- **Stance:** Strongly anti-Russia, supports sanctions.
- **POI:** "Poland fears Russian tactics—how do you ensure sanctions don't harm civilians more than perpetrators?"

Estonia

- **Stance:** Cybersecurity leader, NATO-aligned.
- **POI:** "Estonia leads in cyber defence—how can your model apply globally, not just in NATO contexts?"

Belarus

- **Stance:** Russian ally, rejects Western framing.
- **POI:** "Belarus often defends Russian actions—how can you justify supporting tactics that undermine sovereignty?"

Russia

- **Stance:** Uses grey zones extensively (Ukraine, Syria), rejects Western framing.
- **POI:** "Russia rejects Western framing—how do you justify calling its actions legitimate influence rather than coercion?"

US

- **Stance:** Originator of "grey zones," employs them but calls for accountability.
- **POI:** "The US coined 'grey zones'—how do you justify using the term while employing such tactics yourself?"

Canada

- **Stance:** Liberal democracy, focuses on cyber defence and free speech.
- **POI:** "Canada promotes free speech—how do you balance this with combating disinformation?"

Brazil

- **Stance:** Neutral, prioritizes trade freedom.
- **POI:** "Brazil values trade freedom—how will you prevent economic coercion from being disguised as legitimate trade?"

Israel

- **Stance:** Security-focused, uses proxy tactics, emphasizes self-defence.
- **POI:** "Israel uses proxy tactics—how do you distinguish between legitimate defence and coercion?"

Iraq

- **Stance:** Victim of proxy wars, wary of external interference.
- **POI:** "Iraq has suffered proxy wars—how would accountability frameworks realistically apply to militias?"

Syria

- **Stance:** Proxy battleground, multiple external powers involved.
- **POI:** "Syria is a proxy battleground—how do you realistically hold multiple external powers accountable?"

UAE

- **Stance:** Uses economic leverage, invests regionally.
- **POI:** "The UAE uses economic leverage—how do you distinguish between investment and coercion?"

Kuwait

- **Stance:** Vulnerable small state seeks protection.
- **POI:** "Kuwait is vulnerable to regional powers—how do you ensure small states aren't ignored in frameworks?"

Nigeria

- **Stance:** Faces proxy conflicts, wary of external exploitation.
- **POI:** "Nigeria faces proxy conflicts—how do you prevent external powers from exploiting African disputes?"

Ukraine

- **Stance:** Victim of Russian hybrid warfare seeks stronger international law.
- **POI:** "Ukraine suffers hybrid warfare—how can your framework realistically deter powerful aggressors?"

NOT MY PREP TS LOWK ASS

TOPIC 2: Discussing Oil's Role as a Conflict Instigator in Conflict Zones

OPENING (60s):

Honorable chairs and distinguished delegates, in the Philippines we know oil best when it fries bangus for breakfast — but in conflict zones, it fries our security.

The United Nations has already recognized this danger in our region. In 2015, Security Council Resolution 2199 outlawed oil financing for terrorism, a measure Manila supported as ISIS sought to infiltrate Southeast Asia. Yet loopholes remain wide open, Nigeria still loses up to 400,000 barrels daily to theft while cartels in Mexico siphon pipelines unchecked. It is a proof that oil continues to bankroll violence..

For the Philippines, we import most of our crude from Saudi Arabia and refined products from China and South Korea, leaving our economy exposed to price volatility and coercion. In response, Manila has worked through ASEAN to promote regional security cooperation, diversified energy partnerships, and pushed for transparency in resource governance.

This committee is not about debating oil's flavor, but stripping away its power as a weapon. We urge accountability for proxy actors, diversification to break dependency on imports, and oversight to ensure oil funds development, not destruction. The Philippines seeks decisive frameworks that stop barrels from becoming bullets — because every barrel left unchecked is another shot fired.

GSL (90s)

Honorable chairs and distinguished delegates, loopholes in oil governance remain accelerants of instability.

The Philippines proposes a three-fold framework. First, reform international law to explicitly classify oil theft, petro-aggression, and shadow fleet operations as violations. Resolution 2199 (2015) outlawed oil financing for terrorism, but enforcement remains weak. Manila has consistently invoked UNCLOS to demand accountability for resource exploitation in the West Philippine Sea, and we urge this council to extend that precedent to oil, closing gaps that allow militias and autocrats to weaponize energy.

Second, establish accountability networks. Real-time flagging systems must track illicit flows and proxy actors, exposing cartels siphoning pipelines, militias exploiting oil fields, and shadow fleets moving crude through Asia. The Philippines has advanced ASEAN cooperation on maritime surveillance and cybersecurity, and we call for this council to elevate those regional mechanisms into global enforcement hubs, ensuring greater transparency.

Third, promote diversification and transparent oversight. Manila has pursued Malampaya gas expansion, ASEAN energy dialogues, and regional partnerships to reduce dependency on single suppliers. Yet without global frameworks mandating that oil revenues fund development rather than militias, these efforts remain vulnerable. We urge adoption of oversight models that tie resource revenues directly to infrastructure, education, and healthcare, ensuring oil strengthens societies instead of destabilizing them.

Chairs, loopholes are catalysts for violence. The Philippines calls for decisive enforcement, lest barrels continue to become bullets and prosperity remain hostage to petro-aggression.

Research:

Information: Philippines is highly vulnerable because it relies on imported oil, especially from the Middle East, so conflict around key routes like the Strait of Hormuz quickly affects fuel prices, inflation, and government emergency responses. The evidence centers on extreme import concentration, the strategic importance of Hormuz in global oil trade, and concrete domestic reactions such as sourcing new suppliers and emergency policy measures.

US Government Information: The United States treats oil revenues and oil sanctions as strategic tools in conflict zones, especially in Iraq, Iran, and North Korea. Its evidence comes from examples of US pressure over Iraqi oil revenues, sanctions on Iranian oil smuggling networks, and international enforcement efforts aimed at blocking illicit oil flows that fund armed groups and weapons programs.

Anticipated Goals: Philippines' policy position, which is to push for transparent oversight of oil revenues, stronger enforcement against illicit oil trade, and diversification in oil dependent economies. The evidence used is that heavy oil dependence creates fragility, sanctions loopholes remain open, and cases like Iraq, Kuwait, and Nigeria show how oil wealth can finance conflict unless institutions and accountability improve.

Oil's Role as a Conflict Instigator: Explaining three ways oil drives conflict, by financing non state armed groups, empowering autocratic states to act aggressively, and turning oil supply routes into geopolitical weapons. The evidence includes ISIS oil income, large scale oil theft in Nigeria, research linking oil wealth to higher aggression risk, and recent tanker and sanctions incidents tied to Russia's war financing.

More aggressive, compelling to chairs, (we over did our stats/ restated too many times????), clearer- make it really explicit- hint at solution proposed in gsl, phillipines past actions. Gsl doesnt need our stance - snappy fire (our solutions) right away, higher competence of the topic know whats happening

Chair Report Notes:

r. Nevertheless, it is paramount that delegates

consider implementing measures that strengthen the control of these oil fields.

Delegates must research their country’s past actions in oil

theft and come up with solutions to mitigate the issue at hand.

delegates

propose solutions that strike a balance between the well-being of economies reliant on oil whilst not damaging the global economy.

the aggression of state actors or non-state actors in petrostates is undeniably a major point of contention in this debate.

delegates are encouraged to research which side their country tends to lean towards based on historical records to form a stance on the clash based on historical records.

Strengthening governments

Text 1: 靠脸吃饭 (Facial Recognition Payment)

课文理解 (Understanding the Text)

1. 什么是绿色消费生活方式？
   答案：不用现金，只用手机或刷脸付钱，就是绿色消费生活方式。
2. 是什么改变了这种生活方式？
   答案：科技的进步（支付宝、刷脸机器）改变了生活方式。
3. 这种消费方式受所有中国人的欢迎吗？为什么？
   答案：不是。因为有的人不愿意改变，还是喜欢用现金和排队。
4. 作者是什么时候去的杭州？
   答案：2018年中秋节放假的时候。
5. 在肯德基餐厅吃早餐，只要有支付宝就可以刷脸付款吗？
   答案：不是。第一次用的时候，要先在支付宝上开通刷脸功能。

概念与拓展理解 (Concept and Extension)

6. 传统的生活方式都是不好的吗？为什么？
   答案：不是。传统的生活方式比较慢，但是很安全，很多人还是喜欢。
7. 你愿意接受这样的生活方式吗？为什么？
   答案：我愿意。因为刷脸付钱很快，很方便，不用带钱包。
8. 《课文一》是什么文体？
   答案：是记叙文（作者写自己的一次旅游经历）。
9. 写作目的是什么？
   答案：告诉大家中国现在有很多人用刷脸付钱，生活很便利。
10. 文本的交流对象是谁？交流对象会影响文本的创作吗？
    答案：交流对象是想了解中国生活的外国人。会的，因为文章里介绍了支付宝的用法，让外国人更容易明白。

Text 2: 极简主义生活方式 (Minimalist Lifestyle)

课文理解 (Understanding the Text)

1. 极简主义生活方式有哪些特点？
   答案：东西少，不浪费时间做决定，不买没用的东西，衣服都一样。

2. 为什么要选择极简主义生活方式？
   答案：为了省钱、省时间、让家里变大，可以专心做重要的事。
3. 极简主义生活方式受到哪些人的认可？
   答案：一些成功人士（比如乔布斯、扎克伯格）和很多年轻人。
4. 奥巴马为什么只穿灰色或蓝色西装？
   答案：因为这样可以少做决定，节省时间。
5. 为什么要打造标志性造型？
   答案：因为这样每天就不用想穿什么衣服了，可以节省很多时间。

概念与拓展理解 (Concept and Extension)

6. 你认为哪些人更适合这样的生活方式？
   答案：工作很忙的人、爱买东西的人、家里很小的人。
7. 你认为极简主义生活方式还有哪些好处？
   答案：可以保护环境，少扔垃圾；还可以让人心情更舒服。
8. 你愿意接受这样的生活方式吗？为什么？
   答案：我（不）愿意。因为我觉得生活简单一点很好 / 因为我喜欢买新衣服。
9. 哪些人会接受这样的生活方式？
   答案：喜欢简单生活的人，还有想省钱、省时间的人。
10. 不同的读者读同一篇文章，会有不同的观点吗？
    答案：会的。因为每个人的生活和想法不一样，看法也会不一样。
